General terms of sale

ISEO®

1. Scope
1.1 These general conditions shall apply to all supplies made by ISEO Serrature S.p.A. having registered office in Via San Girolamo 13, 25055 Pisogne (BS) Italy (hereafter "ISEO") to the buyer. No buyer's general conditions shall apply to the transactions with ISEO, unless expressly approved in writing by ISEO. The buyer's acceptance of ISEO's offer or order confirmation from ISEO, however made, shall imply the application of these general conditions to the sales contract.

2. Orders
2.1 Buyer's orders shall become binding following a written order confirmation. The execution of the order is equivalent to the acceptance of the order (hereafter the "Binding Order"). Each offer made by third parties (agents, representatives etc.) shall become binding for ISEO only after the latter's written confirmation.
2.2 A Binding Order shall be executed only in compliance with that specified in the order and these general conditions. Any other documents shall apply only if expressly agreed by the parties.
2.3 Should the buyer request changes to the Binding Order, ISEO shall decide, at its incontestable discretion, whether to accept such request and how to adjust the price accordingly. Should ISEO accept the partial and/or total cancellation of an order, the buyer shall reimburse all costs incurred by ISEO until the time of the cancellation or pay the full price of the products if the manufacture of the products has already been completed.
2.4 Characteristics, the prices and other data included in catalogues, price-lists or other ISEO's illustrative documents, as well as the characteristics of the samples and models sent to the buyer are non-binding, unless explicitly mentioned as binding in the Binding Order.
2.5 Any estimates sent by ISEO are to be considered binding for a period of 1 month from the date of such transmission, unless otherwise specified.
2.6 ISEO shall reserve the right to change and/or improve its products as may be deemed suitable at any time. Should such change be necessary to ensure compliance of its products with the legal regulations in force, ISEO may also modify the characteristics of the products already ordered by simply notifying the buyer of this. In any case, the buyer shall not be entitled to damages.

3. Deliveries/execution of the orders
3.1 Unless otherwise specified in the Binding Order, products shall be delivered according to the delivery terms mentioned below and established in the ICC's Incoterms ® 2010:
Italy: DAP Incoterms ® 2010 – carriage free
EU (Member States of the European Union where no customs duties are applied): DAP Incoterms ® 2010
Rest of the world: as specified in the Binding Order
The delivery terms shown below and/or in the Binding Order are merely indicative and are to be understood having an appropriate period of grace in favor of ISEO. In any case, delivery times are not essential.
Delivery terms for standard supplies are as follows (the classification within a certain status is shown in the ISEO catalogue):
Status "A": prompt delivery (or, for shortage of goods promptly notified by ISEO, within 30 days from the date of the order confirmation)
Status "B": within 30 days from the date of the order confirmation
Status "C": within 60 days from the date of the order confirmation
Status "D": within 90 days from the date of the order confirmation
Delivery terms for supplies made to buyer's job orders shall be agreed from time to time.
3.2 In order to satisfy internal needs, ISEO may, at its discretion, break down a delivery of products into several partial deliveries. ISEO shall be entitled to apply a price increase when the buyer requires urgent deliveries ("urgent" means not within the standard transportation terms) in order to cover additional management, logistics and transportation costs. These costs may vary from time to time.
3.3 For individual orders with a (taxable) order value less than:

Italy:	550.00 €
UE	1,550.00 €
Extra UE countries	3,000.00 €

a fixed (taxable) management contribution shall be charged on the invoice amounting to:

Italy:	25.00 €
UE:	78.00 €

3.4 Should the execution of the order require the obligation to procure parts manufactured from third parties, the execution of the order shall be contingent upon the proper performance by such third parties.

4. Prices and payments
4.1 Prices including packaging (the packaging units are indivisible) are those shown in the ISEO price lists in force when receiving the purchase order. Each new price list shall automatically replace the previous one.
4.2 Should a binding regulation involving an increase of the order execution costs enter into force after the acceptance of the order, ISEO shall reserve the right to adjust the price correspondingly.
4.3 Payments and any other amount due to ISEO for whatever reason shall be understood as net at the creditor's domicile. For no reason whatsoever, including complaints concerning the products supplied, the buyer may suspend the payments due. The payment terms shown on the invoices shall be understood as essential terms.
4.4 For each invoice which will not have been paid by the due date, we will calculate accrued interest on arrears, by applying the official interest rate in force, according to D.lgs 192/2012-implementation of Directives 2000/35/CE and2011/7/UE.
4.5 Should the buyer, for whatever reason, not settle the payment due, ISEO may, at its discretion, either suspend the execution of the ongoing orders, regardless of the fact that they have already been confirmed, until the complete settlement of the amounts due on the basis of the orders already carried out, or require suitable guarantees of payment from the buyer, or unilaterally change the payment conditions for the orders still to be carried out.
4.6 No offsetting with any receivables from ISEO arisen for any reason whatsoever shall be permitted.

5. Retention of title and transfer of risks
The products supplied shall remain the property of ISEO until full settlement of the price of the relevant order. For this purpose, the buyer shall commit himself to take the necessary measures to establish a suitable retention of title, extended as legally admitted, in the country where the products are located or to establish a similar form of guarantee in favor of ISEO. Should a third party creditor of the buyer attempt to seize the goods referred to in the retention of title, the buyer shall (i) promptly notify ISEO and (ii) take all necessary measures to safeguard ISEO's property rights.Regardless of the delivery term applied, the risk of deterioration and/or of damage of the products shall pass from ISEO to the buyer when handing over the products to the first carrier.

6. Guarantee and responsibility/limitations
6.1 ISEO shall guarantee that the products comply with the specifications mentioned in the order and with the Italian legislation in force at the time of the order confirmation and that they are free from engineering, material and construction defects caused by ISEO. In particular, ISEO shall not give any guarantee of compliance with the legislation in force in the country of destination of the products and shall not guarantee that the products are suitable for the use the buyer intends to. The buyer shall be responsible for complying with all the regulations in force concerning marketing and the use of the Products (including the safety regulations). In any case, the buyer's guarantee referred to in this article shall be voided in the following cases: (i) installation and/or use and/or maintenance of the products not in compliance with ISEO's information and operating instructions, (ii) changes and/or repairs without ISEO'S prior written authorization, (iii) normal wear of the products and/or no regular settlement of the product payment by the buyer; (iv) defects resulting from the buyer's engineering and technical specifications, instructions given by the buyer and, more generally, any defects due to the buyer's fault or to activities carried out on the Products by the buyer without ISEO's approval. Furthermore, should ISEO use third party's parts for manufacturing the Products, ISEO's guarantee vis-à-vis the buyer concerning such third parties' products shall be limited to the rights granted by such third party to ISEO.
The guarantee referred to in this article shall last 10 years for fully mechanical products and 3 years for all other products, unless otherwise stated. Both periods shall start from the delivery date.
6.2 The buyer shall inspect the goods immediately upon delivery. The quantity of the individual batches recorded by ISEO when they are sent from its headquarters shall be considered to correspond to the quantity received by the buyer at the time of delivery, unless otherwise proven by the buyer. When receiving the goods, the buyer shall commit himself to notify any visible defect and/or non-conformity in writing within 8 days after delivery by registered letter with acknowledgement of receipt using the D7.1.10 return form available at the ISEO site at the following address: www.iseoserrature.it. Any hidden defects shall be notified in writing by registered letter with acknowledgement of receipt within 8 days after they have been found. Failure to meet the above mentioned term shall lead to forfeiture of each buyer's right resulting from the defects found.
6.3 As a result of a defect notification and within 8 days after the defect has been found, the buyer shall send the product considered to be defective to ISEO, at its own expense, for inspection or should the nature of the product require it, allow ISEO to carry out an inspection on site.
6.4 In any case, products shall be considered defective only after ISEO's technicians have ascertained the presence of the defects. In this case, ISEO shall repair the defective product, or, should no repair be possible or should a repair involve excessive costs, ISEO may, at its discretion, replace the defective product with a conforming product or issue a credit note for the value of the product. ISEO shall not be liable for disassembling, transport, reassembling, reinstallation and inspection costs of the defective products covered by this guarantee.
6.5 Should the case of non-conformity result from circumstances not caused by ISEO, ISEO shall not be liable in any way.
6.6 ISEO's liability for the product shall be limited to direct damages. In no case, ISEO shall be liable for indirect damages or however for damages such as, including but not limited to, reputational damages, damages resulting from loss of use, loss of production, loss of goodwill, loss of profits, loss of contracts, loss of business, loss of income, losses resulting from an increase of operating costs or financial or economic losses. Unless willful misconduct and gross negligence are proven, ISEO's full liability for all claims of any kind of losses or damages resulting from the observance or non-observance of these conditions in connection with an order may not exceed, in any case, a value equal to the order value.

7. Intellectual property
7.1 In any case, the execution of the Binding Order shall not involve a transfer of ISEO's intellectual property rights. ISEO is and shall remain the exclusive owner of these rights. Similarly, no license concerning these rights shall be granted.
7.2 The buyer may not remove or change ISEO's distinctive marks on the products.
7.3 Any drawings or technical documents supplied to the buyer for the purpose of manufacturing or assembling the products sold or parts of them shall remain the exclusive property of ISEO and may neither be used by the buyer nor copied, duplicated, transmitted or communicated to third parties without ISEO's prior approval. ISEO shall not transfer any property rights concerning its software supplied to the buyer. The buyer may neither export nor re-export the software with no relevant license. The buyer shall be forbidden to change the software, carrying out reverse engineering or decompiling or disassembling activities and to license it to third parties (except for cases when, according to the type of software supplied, the license to third parties was tacit or was included in the specific contract with the buyer).
7.4 Should ISEO manufacture the products according to the buyer's instructions, drawings etc. the buyer must hold ISEO indemnified from any claims by third parties for breach of their exclusive property rights to the extent that such breach results from the instructions given by the buyer.

8. Force majeure
8.1 Neither Party shall be held responsible for the breach of any clauses in these conditions and/or in the order confirmed and/or for the delayed fulfilment of the relevant obligations if such breach and/or delay result from circumstances beyond the reasonable control of the Parties, including but not limited to, acts of God, acts of the Government, strikes, riots, shortages of necessary supplies and/or lack of means of transport.
8.2 The Party affected by the event of force majeure shall immediately notify the other Party in writing of the event and of the estimated duration. The fulfillment of the obligations of the Party affected by the event of force majeure shall be suspended for the duration of such force majeure.
8.3 Should such circumstances last more than three months, the other Party shall have the right to terminate the contract with immediate effect by notice in writing to be sent by registered letter with acknowledgement of receipt.

9. Competent court and applicable law
Any dispute relating to or however in connection with these general conditions, and/or the sales contracts entered into according to these general conditions shall be settled by the Court in Brescia. ISEO shall have the right to proceed against the buyer before any other competent Court.
These general conditions as well as each individual supply carried according to them shall be governed by the Italian law.

Doors opening direction

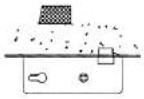

Use Instructions

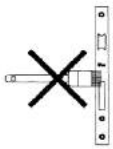

To lubrificate the cylinder use only teflon Interflon Finlube TF.

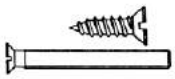

When assembling, make sure drillings and filings do not enter the lock.

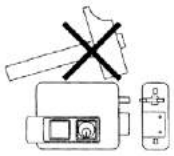

Do not paint the lock front plate, since this may cause damages to the deadbolt and the latchbolt.

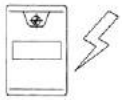

Fixing screws must not cause damage to the product.

For installation, carefully follow the user's instructions or call skilled staff.

To install the lock exclusively use the transformers recommended in the instructions.

Dear Customer,
the outcome of a recent survey has stood out a customer satisfaction level of 92,8%.
This trustworthy and positive result is the effect of the commitment of all the collaborators and employees, which we aim to maintain and improve. It is the successful completion of the targets defined by the company management, which are included in the "Group Mission" too:
"To develop, manufacture and offer door locking systems, integrating security, user-friendliness, compliance with standards and technical specifications drawn up by designers and installers.
To provide our distribution network with the necessary technical and sales support."

Our mission translate into the following values within the System:
- The respect of our world: Ethics, Environment, Safety, Quality, and Privacy;
- Product reliability;
- Endless innovation;
- Respecting our partners' and customers' interests.

The fulfillment of these values allows to improve and implement our Integrated Management System, whose strategic aim and daily effort is the achievement of the following System Certifications and all the necessary product certifications by all the companies of ISEO Group.

* **R6**: standard version with grade "0" anti-drill
version with grade D on request

Category of use
Only one grade is identified:
Grade 1: for use by people with a high incentive to exercise care and with a small chance of misuse.

Key strength and cyclic durability
Three grades of durability are identified as follows:
Grade 4: (25.000 test cycles)
Grade 5: (50.000 test cycles)
Grade 6: (100.000 test cycles).

Door mass
Only one grade of door mass is identified as follows: grade 0 - no door mass requirement.

Suitable for use on fire resistant/smoke control doors.
Three grades of suitability for use on fire resistant/smoke controlled doors are identified.
Grade 0: not approved for use on fire resistant/smoke control door assemblies;
Grade A: suitable for use on smoke control door assemblies;
Grade B: suitable for use on fire resistant and smoke control doors.

Safety
Only one grade of safety is identified: grade 0 - no safety requirement.

Corrosion resistance and temperature.
Four grades of corrosion resistance and temperature requiremnt are identified:
Grade 0: no corrosion requirement; no temperature requirement;
Grade A: high corrosion resistance; no temperature requirement;
Grade B: no corrosion requirement; temperature requirement: from –25°C to +65°C;
Grade C: high corrosion resistance; temperature requirement: from –25°C÷ +65°C.

Key related security
Six grades of key related security are identified.
One of the features is the number of different possible combinations: from min. 100 (grade 1) to max. 100.000 (grade 6).

Attack resistance.
Five grades of resistance against drilling and mechanical attack are identified:
Grade 0: no resistance against drilling and mechanical attack;
Grade A: 3/5 minutes resistance against drilling and mechanical attack (except plug/cylinder extraction);
Grade B: 5/10 minutes resistance against drilling and mechanical attack (except plug/cylinder extraction);
Grade C: 3/5 minutes resistance against drilling and mechanical attack;
Grade D: 5/10 minutes resistance against drilling and mechanical attack.

CSR
R90 Factory

R90 Factory

A patented, multi-profile system, ideal to manage complex master key systems thanks to its 126 different profiles for multi-level hierarchical structures. The patented technical solution, in combination with registered profile, assures the highest protection against illegal duplication of keys. The R90 Factory cylinder also provides encreases protection against external attacks and drilling attempts, thanks to specific devices in the body of the cylinder and the rotor. It also provides protection against tampering, thanks to specially designed and certified bolts and driver pins, and against extraction, thanks to the steel bar positioned in the body of the cylinder.

bsi.
Kitemark™ Certificate

Design and certification

According to the European standard EN 1303:2015.

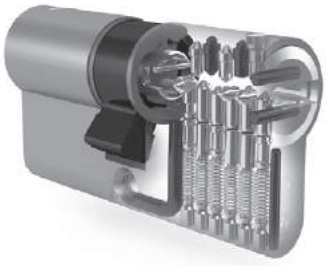

Certification against tampering

The R90 series cylinders have obtained the number KM544418 certification through the BSI regulation body assuring a high resistance to BUMPING (certification obtained in combination with the locks).

SKG Certification

SKG guarantees the products' continuous compliance with the highest security requirements. The SKG certification represents an added value for breaking-through tests on doors and windows and the SKG brand on products is a guarantee high resistance and maximum security.

Available option with **VdS** certification.

Technical Specifications

Attack resistance

- Grade D;
- Anti-break harmonic steel bar to increase resistance to breaking and extraction;
- Resistance to bumping: pins and driver pins certified against tampering;
- Resistance to drilling: anti-drilling devices in the body and in the cylinder.

Key related security

- Grade 6: minimum 100,000 key combinations;
- Trademark on the keys for unlimited protection;
- Keys protected by patents against illegal and non-authorised duplication;
- Property Card;
- Keys can only be duplicated at ISEO upon presentation of the Property card;
- Nickel silver keys;
- Code numbering on the neck of the key.

Multi-level master key system

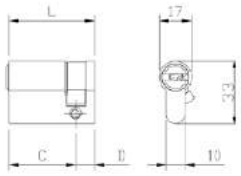

- 3 rows bitting system: upper, lower and lateral bitting for complex master key systems;
- Multi profiles available for multi level master key systems;

Cylinders

R11 Progress

R11 Progress

R11 Progress cylinders have been designed to withstand tampering techniques such as bumping, picking and drilling. Furthermore, they are equipped with a special anti-snapping bar in harmonic steel, designed to increase resistance to breakage or extraction.The key is flat and reversible, with an ergonomic, plastic handgrip. It is made entirely of nickel silver, a highly resistant metal alloy and it is patent-protected. In order to protect you from unauthorised duplications, your keys can be duplicated by an ISEO center only upon presentation of the Property Card.

Designed and certification

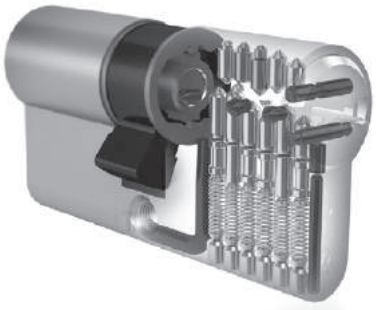

according to EN 1303:2015 European standards.

Certification against tampering

The R11 Progress series cylinders have obtained the number KM544418 certification from the **BSI** regulatory body, which guarantees a high resistance to picking and tampering.

SKG Certification

The **SKG** certification provides a continuous guarantee of product compliance with the highest safety requirements and is an essential added value in terms of prevention of breaking and entering. Products displaying the SKG trademark provide higher resistance to the most common break-in techniques, such as drilling.

Technical Specifications

Attack resistance

- Grade D;
- Drill resistant: anti-drill devices in the body of the cylinder;
- Bumping resistant: certified anti-tampering pins and counterpins;
- Anti-break bar in harmonic steel to increase resistance to breaking and extraction.

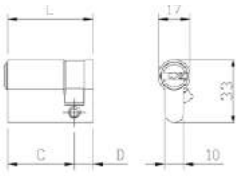

Key related security

- Grado 6: min. 100,000 bittings;
- Key protected by patent against illegal and unauthorised key duplication;
- Property Card;
- Nickel silver key with long neck;
- Ergonomic plastic key handgrip.

R11 Progress

R11 Progress European **SINGLE-PROFILE** cylinder. Patented flat nickel silver key with 11 pins, with plastic handgrip. Anti-drill device in the cylinder body and in the rotor. 8-position DIN cam. **5 KEYS. BUMP RESISTANT. PROPERTY CARD.** Key head cap. 85 mm screw.

R7 Extra

R7 Extra

REVERSIBLE KEY CYLINDER, R7 EXTRA protects against attacks from unwanted visitors, with design and specification according to the highest grade of the European standard EN 1303:2015. Furthermore, R7 EXTRA has been tested by international bodies (in Italy, U.K., Germany and the Netherlands) and has obtained the maximum level of certification to ensure protection against drilling attempts, tampering and lockpicking.

ICIM

Certificazione di Prodotto
Product Certification

ISEO SERRATURE S.p.A.

Design and certification

According to the European standard EN 1303:2015

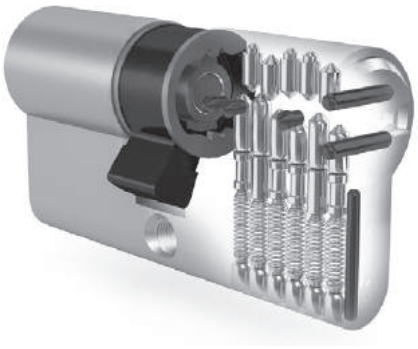

Certification against tampering

The R7 Extra series cylinders have obtained the number KM544418 certification from the **BSI** regulatory body, which guarantees a high resistance to picking and tampering.

SKG Certification

The **SKG** certification guarantees the products' continuous compliance with the highest security requirements and is a fundamental added value for as much as breaking-through proofs are concerned. The SKG brand on products guarantees high resistance to the most common lockpicking techniques.

A2P certification grade 1 obtained in combination with the 600G lock series.

Technical features

Attack resistance

- Grade D;
- Resistance to drilling: anti-drilling devices in the body and in the rotor;
- Resistance to bumping: bolts and driver pins that are certified against tampering.

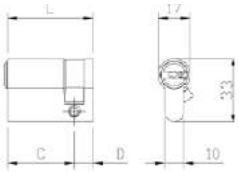

Key related security

- Grade 6: minimum 100,000 key combinations;
- Code Card, to get a high quality duplicate;
- Brass key heads with the possibility to add a plastic cap, included in the package.

R7 Extra

R7 Extra European SINGLE-PROFILE cylinder. Nickel-plated brass reversible key with 11 pins.
BUMP RESISTANT. Anti-drill device in the cylinder body and in the rotor.
8-position DIN cam. **5 KEYS. CODE CARD.**
Key head cap. 85 mm screw. (Key blank code: 020909....H).

Cylinders

R6

R6

The R6 reversible flat key cylinder, with a standard security level, protects you against external attacks thanks to reliable solutions in the cylinder body.

Design and certification

According to the European standard EN 1303:2015.

The R6 cylinder is certified to a standard security level. Specific solutions inside the cylinder body protects you against undesired attacks.

SKG Certification (option)

The R6 cylinder is also available with **SKG** certification.

Technical features

Attack resistance

- Grade 0/Grade D*
- Standard security level: locking system with 6 stainless steel pins.
- Resistance to picking thanks to brass mushroom-shaped driver pins.
- Drilling resistance thanks to inserts positioned on both sides of the cylinder body.

Key related security

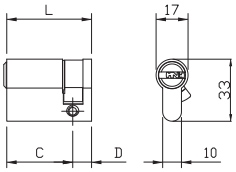

- Grade 5: min. 30.000 key combinations.
- Reversible nickel-plated brass keys.
- Numbering code on the neck of the key.
- Code Card, to get a high quality duplicate.

* **R6**: standard version with grade “0”;
anti-drill version with grade D on request

R6

R6 European SINGLE-PROFILE cylinder. Nickel-plated brass flat key with 6 pins. Anti-drill device in the cylinder body. 8-position DIN cam. **5 KEYS. CODE CARD**. 65 mm screw. (Key blank code: 020839).

Cylinders

F6 Extra

F6 Extra

Cylinder with a certified security level, with good master keying potential to control accesses of houses or medium-sized commercial organisations. F6 Extra combines master keys capacity with the highest security standards, certified by international bodies.

Design and certification

According to the European standard EN 1303:2015

Certification against tampering

The F6 Extra series cylinders have obtained the number KM544418 certification from the **BSI** regulatory body, which guarantees a high resistance to picking and tampering.

SKG Certification

The **SKG** certification provides a continuous guarantee of product compliance with the highest safety requirements and is an essential added value in terms of prevention of breaking and entering. Products displaying the SKG trademark provide higher resistance to the most common break-in techniques, such as drilling.

Technical Features

Attack resistance

- Grade D
- Standard level of security: locking system with 6 stainless steel pins.
- Resistance to lock-picking thanks to the brass, mushroom-shaped driver pins.
- Drill resistance thanks to inserts positioned on both sides of the cylinder.
- Resistance to bumping: bolts and driver pins that are certified against tampering.

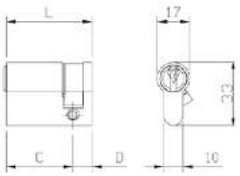

Key related security

- Grade 5: min. 30.000 key combinations.
- Standard flat nickel-plated brass keys.
- Numbered code on the neck of the key.

F6 Extra

F6 Extra, European SINGLE-PROFILE cylinder. Nickel-plated brass vertical key with 6 pins. **BUMP RESISTANT.** Anti-drill device in the cylinder body and in the rotor. 8-position DIN cam. **3 KEYS**. Screw 65 mm. (Key blank code: 020609).

SWISSDOOR
DØRTEKNIK FOR PROFESSIONELLE

Cylinders

F6

F6

The F6, with reliable solutions against lock-picking attempts, is the ideal cylinder to manage a master key system that secures entrances that require a basic level of protection.

Design and certification

According to the European standard EN 1303:2015

The F6 cylinder is certified to a standard security level. Specific solutions inside the cylinder body protects you against undesired attacks.

Technical Features

Attack resistance

- Grade 0;
- Standard security level: locking system with 6 stainless steel pins;
- Resistance to picking thanks to brass mushroom-shaped driver pins;
- Drilling resistance thanks to inserts positioned on both sides of the cylinder body.

Key related security

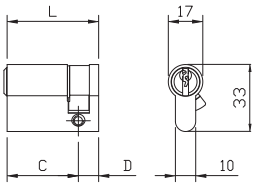

- Grade 6: min. 100.000 key combinations;
- Standard vertical nickel-plated brass keys;
- Numbering code on the neck of the key.

F6

F6 European SINGLE-PROFILE cylinder. Nickel-plated brass vertical key with 6 pins.
Anti-drill device in the cylinder body. 8-position DIN cam.
3 KEYS. Screw 65 mm. (Key blank code: 020609).

SWISSDOOR
DØRTEKNIK FOR PROFESSIONELLE

Cylinders

F5

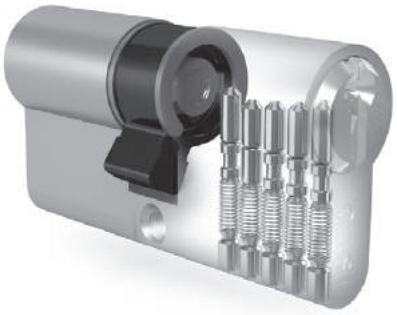

F5

The F5 cylinder guarantees a standard level of protection against drilling attempts and offers security for entrances.

Design

According to the European standard EN 1303:2015

Technical features

Attack resistance

- Grade 0
- Standard level of security: locking system with 5 pins
- Resistance to picking thanks to the brass mushroom-shaped driver pins.

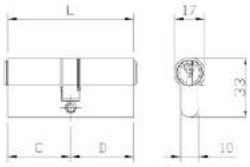

Key related security

- Grade 4: min. 30.000 key combinations.
- Standard vertical nickel-plated brass keys.
- Numbering code on the neck of the key.

F5

F5 European DOUBLE-PROFILE cylinder, 5-pin big key. DIN straight cam.
3 KEYS. Screw mm 65. (Key blank code: 020259).

Typologies of Master Key systems

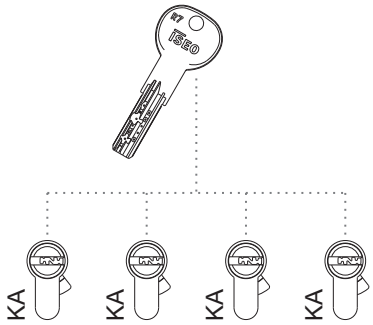

Key to differ (KD).
Each cylinder is opened by its own key.

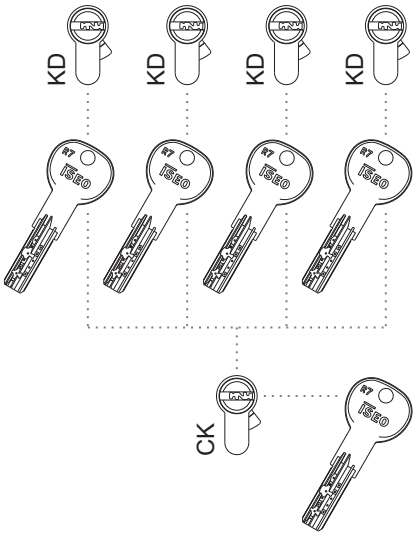

Keyed alike (KA).
Several cylinders with the same coding are opened by the same key.

Common lock system (CK).
Each individual key opens only its own cylinder and the central lock cylinder (i.e. the common entrance in an apartment block).

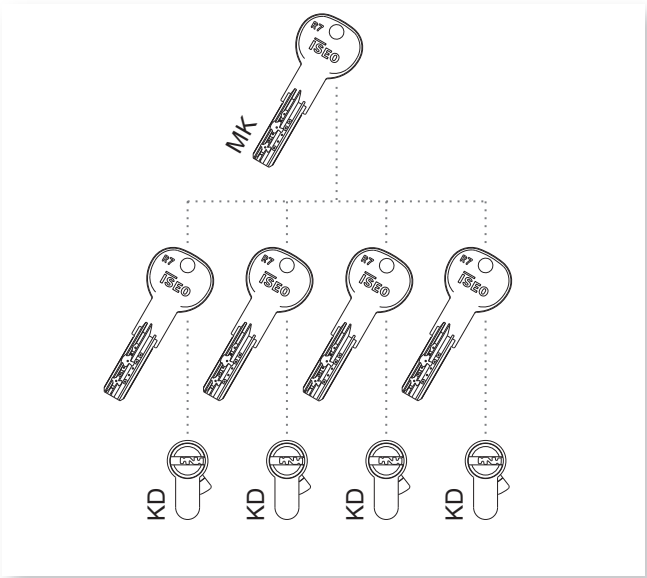

Typologies of Master Key systems

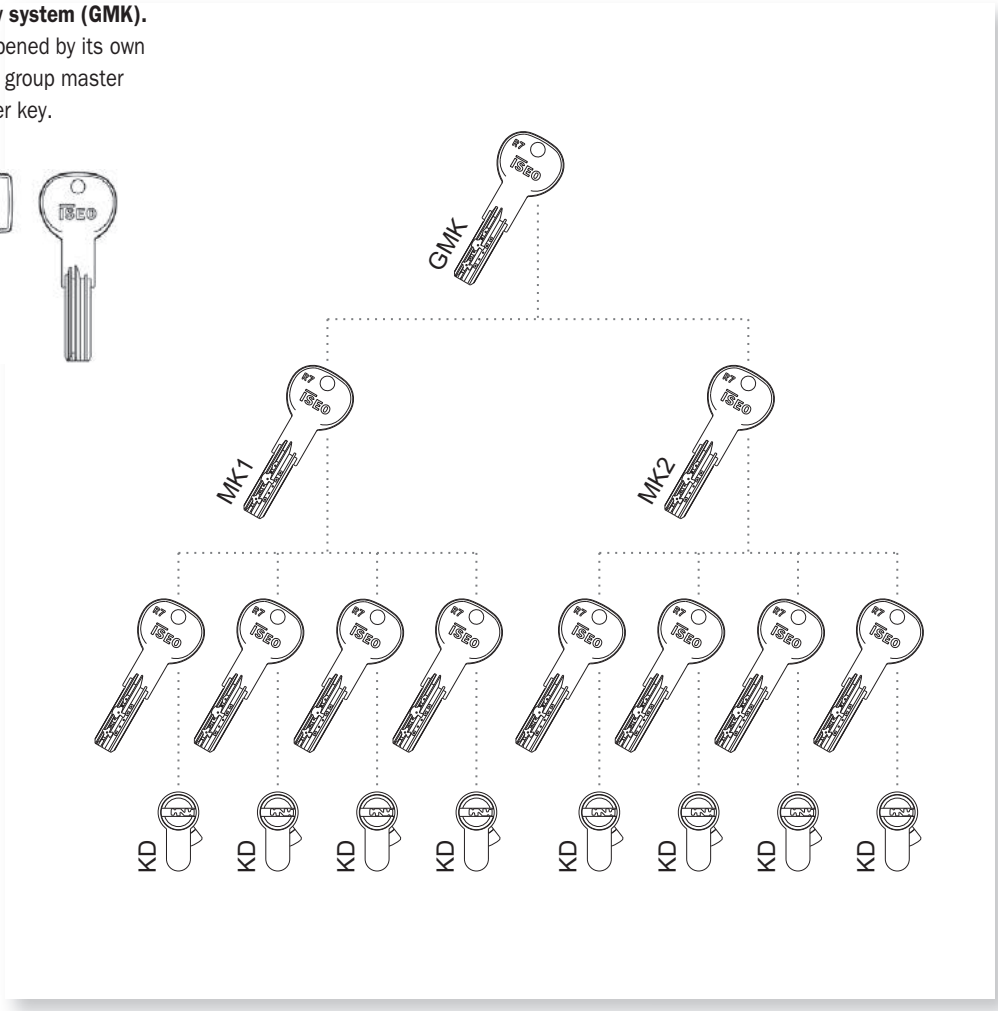

Master Key system (MK).
Each cylinder is opened by its own individual key and by the master key.

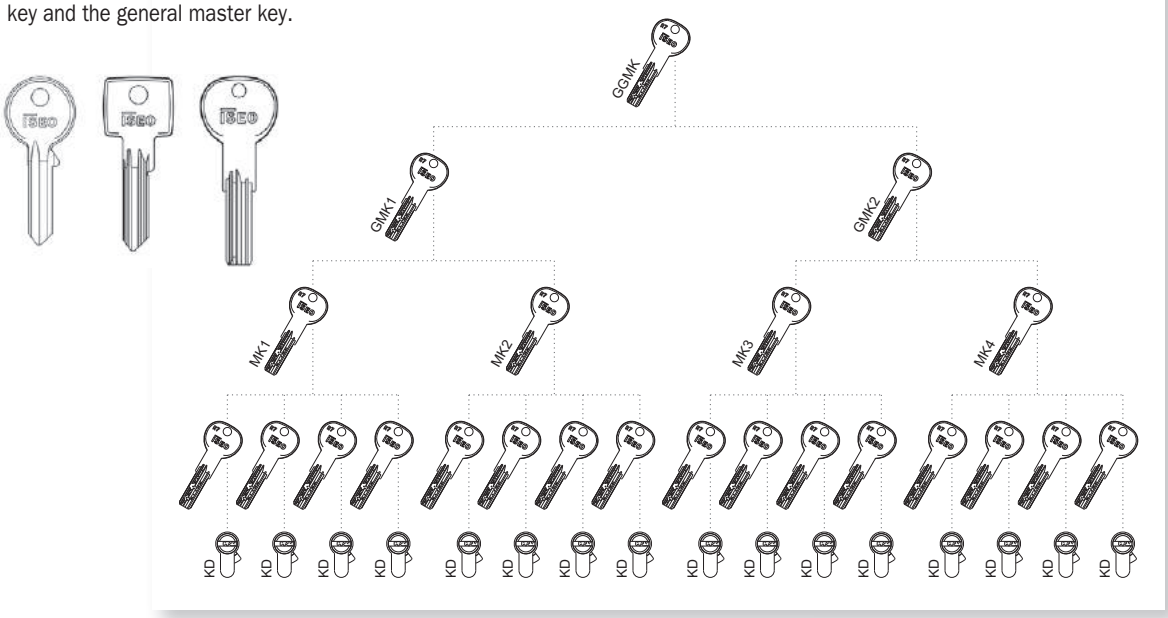

Grand Master Key system (GMK).
Each cylinder is opened by its own individual key, the group master key and the master key.

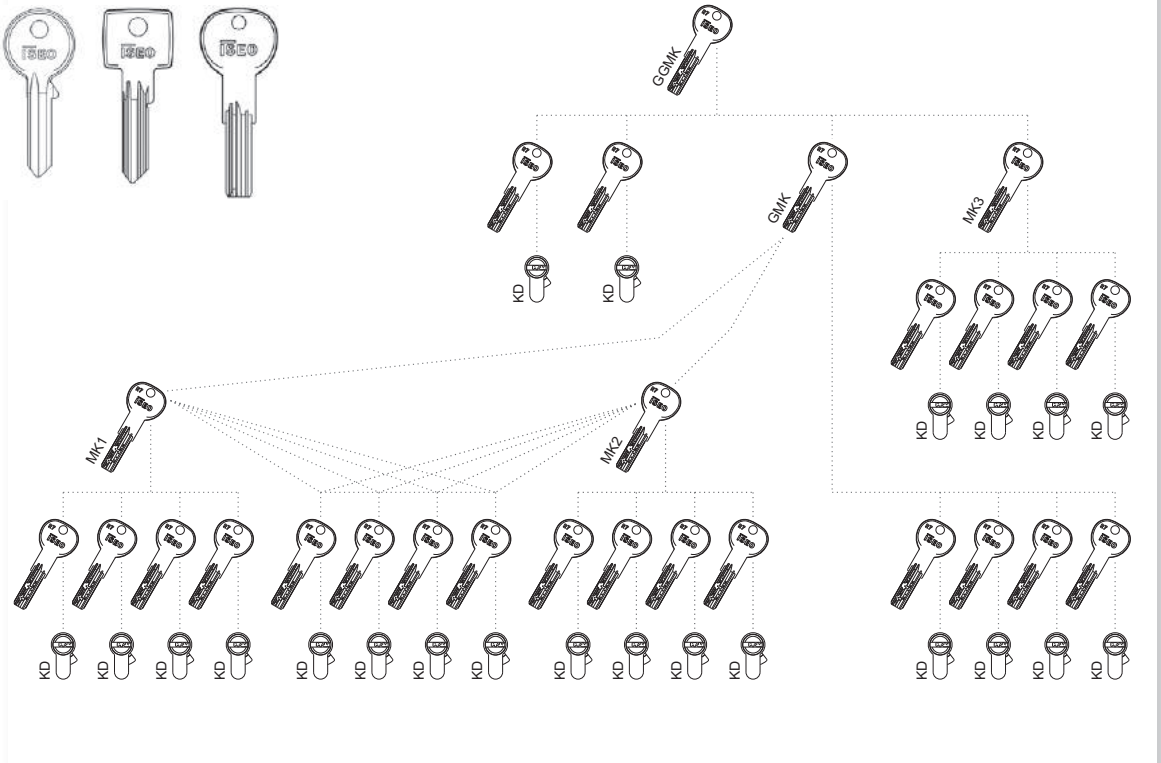

Typologies of Master Key systems

Great Grand Master Key system (GGMK).
Each cylinder is opened by its own individual key, the group master key and the general master key.

Complex Master Key system.
Individual keys or master keys belonging to different groups of cylinders can open one or more cylinders belonging to other groups.

Instructions for filling out the chart by the customer to order the Master key system

1 **Project.** Optional, indicate the construction.

2 **Customer.** Write the name of the customer or the code ISEO has assigned to the customer.

3 **System.** Write an (X) to indicate the requested cylinder range.

3A **Profile.** Indicate the profile code for CSF - CSR systems.

4 **Func.** Indicate the kind of functions. The Master Keys should have, e.g. MK1.

5 **Marking**. If required, write the requested alphanumeric code, max 9 characters.

6 **Qt.** Write the requested quantity of Master Keys.

7 **Pos.** Indicate a progressive number.

8 **CK.** Indicate the cylinder marking which should be central.

9 **Pos.** Indicate a progressive number.

10 **Location.** Indicate the location where the cylinder will be installed.

11 **KA – CN.** Indicate if two or more cylinders are Keyed Alike even if they are on different lines.

12 **Article.** Write the code of the requested cylinder.

13 **Qt.** Usually 1. Indicate more than 1 if identical cylinder are required.

14 **Marking.** If required, write the wanted alphanumeric code, max 9 characters.

15 **Qt.** Indicate the requested number of the keys for each cylinder (more or equal to 3 pieces).

16 **Connection.** An (X) indicates the connection between the Master Key and the single cylinder.

17 **Connection.** An (I) indicates the connection between the central key and the keys combined with

L mm 120		(65+55)	**82R7065559S.W**	1	10	10

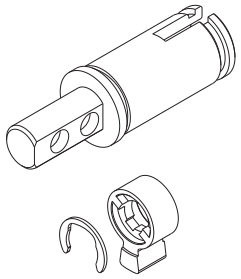

R7 Extra Specific components

	Code	Single package	Multiple package	Min. ord.
10 pieces KIT. Nickel-plated brass rotor for **R7 and U.K.** European profile cylinders.				
Key side **mm 30**	**0047259..H**	10	-	1
Key side **mm 35**	**0047309..H**	10	-	1
Key side **mm 40**	**0047359..H**	10	-	1
Key side **mm 45**	**0047409..H**	10	-	1
Key side **mm 50**	**0047459..H**	10	-	1
Key side **mm 55**	**0047509..H**	10	-	1
Key side **mm 60**	**0047559..H**	10	-	1
Key side **mm 65**	**0047609..H**	10	-	1
Key side **mm 70**	**0047659..H**	10	-	1
Key side **mm 75**	**0047709..H**	10	-	1
Key side **mm 80**	**0047759..H**	10	-	1
Key side **mm 90**	**0047859..H**	10	-	1

10 pieces KIT. Extension piece for European profile cylinders.				
length **5 mm**	**003211**	10	-	1
length **10 mm**	**003212**	10	-	1
length **15 mm**	**003213**	10	-	1
length **20 mm**	**003214**	10	-	1
length **25 mm**	**003215**	10	-	1
length **30 mm**	**003216**	10	-	1
length **35 mm**	**003217**	10	-	1
length **40 mm**	**003218**	10	-	1

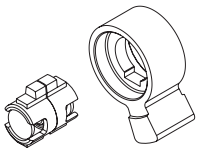

10 pieces KIT. Brass rotors for knob side European profile cylinders. **Shaft 16 mm.** Supplied with **30° DIN** cam and circlip.				
knob side **30 mm**	**003191**	10	-	1
knob side **35 mm**	**003192**	10	-	1
knob side **40 mm**	**003193**	10	-	1
knob side **45 mm**	**003194**	10	-	1
knob side **50 mm**	**003195**	10	-	1
knob side **55 mm**	**003262**	10	-	1
knob side **60 mm**	**003203**	10	-	1
knob side **65 mm**	**003204**	10	-	1
knob side **80 mm**	**003205**	10	-	1

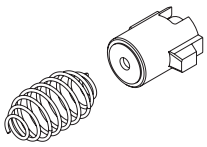

10 pieces KIT. Brass rotors for European profile cylinders **mm 30 knob side**. **Shaft 75 mm**. Supplied with **30° DIN** cam and circlip.	**003186**	10	-	1

R7 Extra Specific components

	Code	Single package	Multiple package	Min. ord.
10 pieces KIT. Clutch system, 30° DIN cam, for cylinders, double function				
mm 30+30 cylinder	**003220**	10	-	1
mm 30+35 cylinder	**003221**	10	-	1
mm 35+35 cylinder	**003222**	10	-	1

10 pieces KIT. Clutch system and spring for knob kit cylinder.				
Key side mm 30	**003187**	10	-	1
Key side mm 35	**003188**	10	-	1

R6 Pre-assembled cylinder

10 pieces KIT. EUROPEAN SINGLE PROFILE NICKEL-PLATED cylinder. 6-pin key.
Pre-assembled, 8-position DIN cam, steel circlip, springs, counterpins, plugs, nylon plug.
Anti-drill device in the cylinder body. Fixing screw. Rotor to be ordered separately.

R6 Specific components

	Code	Single package	Multiple package	Min. ord.
				
250 pieces KIT. Brass circlip for cylinders.				
D=20 H=14 thickness mm 1	**0037001**	250	-	1
				
250 pieces KIT. Steel circlip for European profile cylinders.				
For cylinders mm 56 - 61 only				
D=15,6 H=12,2 thickness mm 1	**0037011**	250	-	1
				
250 pieces KIT. Steel circlip knob side cylinders.				
D=15,5 H=12,2 thickness mm 1	**0037121**	250	-	1
				
1000 pieces KIT. STAINLESS STEEL top pin for European profile cylinders.				
Ø2,5 x L=5,1 - **step 0**	**0032151**	1000	-	1
Ø2,5 x L=5,6 - **step 1**	**0032156**	1000	-	1
Ø2,5 x L=6,1 - **step 2**	**0032161**	1000	-	1
Ø2,5 x L=6,6 - **step 3**	**0032166**	1000	-	1
Ø2,5 x L=7,1 - **step 4**	**0032171**	1000	-	1
Ø2,5 x L=7,6 - **step 5**	**0032176**	1000	-	1
				
1000 pieces KIT. Brass top pin for cylinders.				
Ø2,5 x L=5,6 mm for European profile cylinder	**0033150**	1000	-	1
Ø2,5 x L=3,5 mm for round cylinder Ø 26 and rim cylinder	**0033160**	1000	-	1
				
1000 pieces KIT. Anti-picking brass top pin for cylinders.				
Ø2,5 x L=5,0 mm for European profile cylinder	**0034150**	1000	-	1
Ø2,5 x L=3,5 mm for round cylinder Ø 26 and rim cylinder	**0034160**	1000	-	1
				
KIT 1000 pezzi. Brass master wafer for cylinders.				
Ø2,5 x L=1,0 mm - **step 2**	**0039110**	1000	-	1
Ø2,5 x L=1,5 mm - **step 3**	**0039115**	1000	-	1
Ø2,5 x L=2,0 mm - **step 4**	**0039120**	1000	-	1
Ø2,5 x L=2,5 mm - **step 5**	**0039125**	1000	-	1
				
1000 pieces KIT. Cone-shaped brass plug for cylinders.				
Ø2,8 x L=3,6 mm for round cylinder Ø 26 and rim cylinder	**0035130**	1000		1
Ø2,8 x L=3,0 mm for European profile cylinder	**0035136**	1000	-	1
				
1000 pieces KIT. Spring.				
Ø2,5 x L=13,5 mm for European profile cylinder	**0038135**	1000	-	1
Ø2,5 x L=8,3 mm for round cylinder Ø 26 and detacted cylinders	**0038084**	1000	-	1

Components

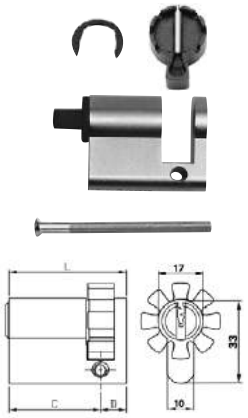

F6/F6 Extra

F6/F6 Extra Assembling tools

	Code	Single package	Multiple package	Min. ord.
 Pinning kit for **cylinders** provided with all spare parts and instructions.	**003031**	1	-	1
 Coding tool for **European profile cylinders** and **U.K. profile cylinders** with instructions for coding changing and specific screwdriver.	**003109**	1	-	1
 Pinning blade for **European profile cylinders** coding tools.	**003111**	1	-	1
Pinning blade for **U.K. profile cylinders** coding tools.	**003112**	1	-	1
 Circlips plier.	**003104**	1	-	1
 Brass circlips closing plier.	**003105**	1	-	1
 Plier for cylinder pins insertion .	**003106**	1	-	1
 Pinning blade for **European profile cylinders.**	**003007**	1	-	1
Pinning blade for **U.K. profile cylinders.**	**003082**	1	-	1
 Pinning blade for **cylinders Scandinavian profile.**	**003079**	1	-	1

F6/F6 Extra Pre-assembled cylinder

10 pieces KIT. F6 EUROPEAN SINGLE PROFILE NICKEL-PLATED cylinder. 6-pin key.
Pre-assembled, 8-position DIN cam, steel circlip, springs, counterpins, plugs, nylon plug.
Anti-drill device in the cylinder body. Fixing screw. Rotor to be ordered separately.

Padlocks

	Code	Single package	Multiple package	Min. ord.
   RECTANGULAR padlock BOXER, **FULLY ARMOURED**, for gates. Body in zamak and 96 mm case in chrome-plated carbonitrited steel. **TO BE USED WITH mm 40 (30+10) EUROPEAN SINGLE PROFILE CYLINDER**, with projecting cam. STAINLESS STEEL shaft Ø 12, opening grip. Shaft ball-locking. **36 x 17,5 mm shaft clearance.** When the padlock is open the case can be removed to place the cylinder. **Cylinder to be ordered separately.** The key can be removed only when the padlock is closed.	**809909I**	1	-	1

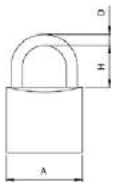

UNIVERSAL padlock. PREARRANGED FOR mm 40 (30+10) EUROPEAN PROFILE CYLINDER, with projecting cam.
54 mm body in satin nickel-plated brass.
STEEL shaft Ø 8, 30 or 50 mm shaft clearance.
Cylinder to be ordered separately.

H= 30 mm **carbonitrited steel shaft**	**40006000000030**	1	-	1
H= 50 mm **stainless steel shaft**	**40006000000050**	1	-	1
H= 30 mm **carbonitrited steel shaft** The key can be removed only when the padlock is closed.	**4000600000SZ30**	1	-	1
H= 50 mm **stainless steel shaft** The key can be removed only when the padlock is closed.	**4000600000SZ50**	1	-	1

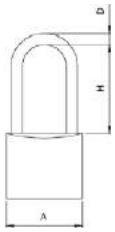

Solid brass padlocks

	Code	Single package	Multiple package	Min. ord.
IUSTUS shackle padlock. **BODY IN BRASS**. Chrome-plated steel shackle. (key blank 020259). Antipick disk.				
50 mm, 5 pins, **28 mm** shackle	**800507W.SA**	1	10	10
60 mm, 5 pins, **35 mm** shackle	**800607W.SA**	1	10	10
70 mm, 5 pins, **44 mm** shackle	**800707W.SA**	1	10	10

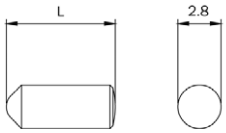

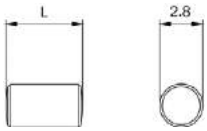

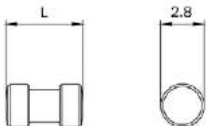

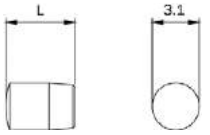

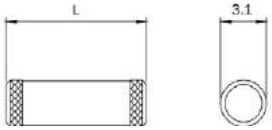

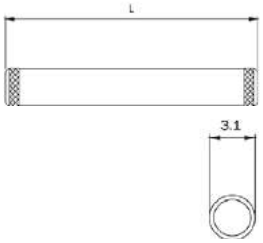

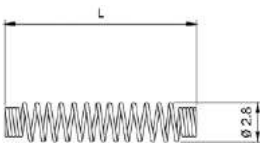

IUSTUS long shackle padlock. **BODY IN BRASS**. Chrome-plated steel shackle. (key blank 020259). Antipick disk.				
50 mm, 5 pins, **50 mm** shackle	**802507W.SA**	1	10	10
50 mm, 5 pins, **90 mm** shackle	**802527W.SA**	1	10	10

IUSTUS RECTANGULAR padlock for gates. **mm 70 BODY IN BRASS**. Shaft in chrome-plated carbonitrided steel Ø 12, opening grip. Shaft ball-locking (key blank 020259).				
mm 20 X 15 SHAFT CLEARANCE.	**804707W.SA**	1	6	6
IUSTUS RECTANGULAR padlock for gates. **mm 90 BODY IN BRASS**. Shaft in chrome-plated carbonitrided steel Ø 12, opening grip. Shaft ball-locking (key blank 020259).				
mm 36 X 18 SHAFT CLEARANCE.	**804907W.SA**	1	6	6

Specific components

	Code	Single package	Multiple package	Min. ord.
				
1000 pieces KIT. Brass pin for **F5** cylinders and **IUSTUS padlocks** coding. (For big keys).				
Ø2,8 x L=5,0 mm - **step 0**	**0032050**	1000	-	1
Ø2,8 x L=5,4 mm - **step 1**	**0032054**	1000	-	1
Ø2,8 x L=5,8 mm - **step 2**	**0032058**	1000	-	1
Ø2,8 x L=6,2 mm - **step 3**	**0032062**	1000	-	1
Ø2,8 x L=6,6 mm - **step 4**	**0032066**	1000	-	1
Ø2,8 x L=7,0 mm - **step 5**	**0032070**	1000	-	1
Ø2,8 x L=7,4 mm - **step 6**	**0032074**	1000	-	1
Ø2,8 x L=7,8 mm - **step 7**	**0032078**	1000	-	1
Ø2,8 x L=8,2 mm - **step 8**	**0032082**	1000	-	1
				
1000 pieces KIT. Anti-picking brass top pin for **F5** cylinders. **IUSTUS padlocks: mm 45 - 50 - 60 - 70** and **mm 70 - 90 for gates**.				
Ø2,8x L=5 mm	**0033050**	1000	-	1
				
1000 pieces KIT. Brass top pin for **F5** cylinders, **IUSTUS padlocks: mm 45 - 50 - 60 - 70** and **mm 70 - 90 for gates**.				
Ø2,8 x L=5 mm	**0034050**	1000	-	1
				
1000 pieces KIT. Brass cone shaped plug for **F5** cylinders, **IUSTUS padlocks: mm 45 - 50** and **mm 70 for gates.**				
Ø3,1 x L=4,5 mm	**0035049**	1000	-	1
				
1000 pieces KIT. Plug.				
For mm 60 shackle padlocks, mm **3,1x9,5**	**0035095**	1000	-	1
For mm 70 shackle padlocks and mm 90 rectangular padlocks, mm **3,1x14,5**	**0035145**	1000	-	1
				
200 pieces KIT. Cylinders retaining pin				
mm 45 - 50 shackle padlocks, mm **3,1x20,5**	**0036205**	200	-	1
mm 60 shackle padlocks, mm **3,1x25,5**	**0036255**	200	-	1
mm 70 shackle padlocks, mm **3,1x30,5**	**0036305**	200	-	1
mm 70 rectangular padlocks, mm **3,1x21,5**	**0036215**	200	-	1
mm 90 rectangular padlocks, mm **3,1x31,5**	**0036315**	200	-	1
				
1000 pieces KIT. Spring for **F5** cylinders, **IUSTUS padlocks mm 45 - 50 - 60 - 70** and **mm 70 - 90 for gates.**				
Ø2,8x L=13 mm	**0038130**	1000	-	1

How to read the marking UNI EN 12209:05

Classification for mechanical locks (lateral locking).

3	X	8	0	0	G	2	H	A	2	0
Category of use	Durability and load on latchbolt	Door mass and locking force	Suitability for use on fire/smoke resistant doors	People's safety	Corrosion resistance and temperature requirement	Goods' security and drill resistance	Field of door application	Type of key operation and locking	Type of spindle operation	Key identification requirement

Category of use
There are three grades (example: grade 1: for residential doors, grade 2: for offices doors, grade 3: for doors in public buildings)

Durability and load on latchbolt
There are twelve grades (example: grade A: 50.000 operations and no load on latchbolt
grade X: 200.000 operations and 120 N load on latchbolt)

Door mass and locking force
There are nine grades (example: grade 1: up to 100 kg door mass with 50 N maximum locking force,
grade 9: over 200 kg door mass with 15 N maximum locking force)

Suitability for use on fire/smoke resistant doors
There are two grades (example: grade 0: non suitable for use on fire/smoke resistant door,
grade 1: suitable for use on fire/smoke resistant door)

People's safety
There is only one grade: grade 0: no safety requirement

Corrosion resistance and temperature requirement
There are eight grades (example: grade 0: no corrosion resistance and temperature requirement,
grade G: very high corrosion resistance and temperature requirement from -20°C up to +80°C)

Goods' security and drill resistance
There are seven grades (example: grade 1: minimum security and no drill resistance, grade 7:
very high security and drill resistance)

Field of door application
There are fifteen grades (example: grade A: mortice lock for sliding or hinged door, grade T:
rim lock for sliding or hinged door, front plate not supported)

Type of key operation and locking
There are nine grades (example: grade A: cylinder lock or latch; manually locking,
grade H: lock without key operation and automatically locking)

Type of spindle operation
There are five grades (example: grade 0: lock or latch without follower, grade 4:
lock or latch for heavy duty unsprung lever handle operation specified by the manufacturer)

Key identification requirement
There are nine grades (example: grade 0: no requirements, grade H:
minimum eight detaining elements, extended number of effective differs)

For further information please refer to UNI EN 12209:05 standard

How to read the marking prEN 15685:09

Classification for mechanical locks (multipoint locking).

3	X	8	A	0	G	7	3	1
Category of use	Durability and load on latchbolt	Door mass and locking force	Suitability for use on fire/smoke resistant doors	Key identification requirement	Corrosion resistance and temperature requirement	Security for locking POINT	Security for anti-separation POINT	Clenching POINT

Category of use
There are three grades (example: grade 1: for residential doors, grade 2: for offices doors, grade 3: for doors in public building)

Durability and load on latchbolt
There are ten grades (example: grade A: 50.000 operations and no load on latchbolt for locks without latchbolt, grade Z: 500.000 operations and 120 N load on latchbolt)

Door mass and locking force
There are ten grades (example: grade 1: up to 100 kg door mass and 50 N maximum locking force, grade 9: over 200 kg door mass and 15 N maximum locking force)

Suitability for use on fire/smoke resistant doors
There are three grades (example: grade 0: non suitable for use on fire/smoke resistant door, grade B: suitable for use on fire/smoke resistant door)

Key identification requirement
There are nine grades (example: grade 0: not applicable, grade H: minimum eight detaining elements, extended number of effective codings)

Corrosion resistance and temperature requirement
There are eight grades (example: grade 0: no corrosion resistance and no temperature requirement, grade G: very high corrosion resistance and temperature requirement from -25°C up to +70°C)

Security for locking point
There are six grades (example: grade 0: no security requirements, grade 7: very high security with drill resistance)

Security for anti-separation point
There are eight grades (example: grade 0: no declared anti-separation POINT, grade 7: very high performance with drill resistance)

Clenching point
There are five grades (example: grade 0: no clenching force requirements, grade 4: clenching force = 120 N)

DØRTEKNIK FOR PROFESSIONELLE

Multiblindo eMotion

Electromechanical automatic lock

Multiblindo eMotion

Perfect combination of comfort and security in any situation.
The new electromechanical automatic lock represents the electronic evolution of Multiblindo Easy.
From the outside it operates by key or the most advanced electronic access control systems: fingerscan, keyboard, transponder, PIN-code. From the inside it operates electronically in a simple and fast way through a normal keyboard, allowing the end user to set three different locking functions: Total, Light, Free.

It is certified

according to EN14846:08 and prEN15685:09 European standards.
Multiblindo eMotion ensures top-level intrusion protection; it doesn't lose the settings in case of a blackout and, if necessary, it always assures the mechanical key or handle action.

Example of certification:

3	X	8	D	0	M	7	1	3

With sound feedback

A special system monitors the door status and sends opening and closing sound signals, which can be set or completely excluded by the end user.

Set your time

The user can set the time span between the opening pulse and the automatic relocking of the door.

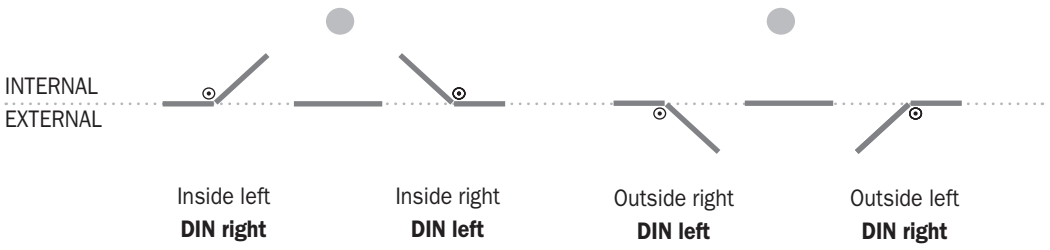

Multiblindo eMotion has three options allowing an instant opening as well as to choose the automatic relocking mode according to the user's security requirements. It is operated through an electronic control for all the settings.

Total. When pressing the pushbutton the door opens and a sound signal is produced. When it closes, Multiblindo eMotion will automatically trigger the latchbolt and deadbolts: the sound feedback will indicate the total locking. Total security: this setting ensures your door the highest security.

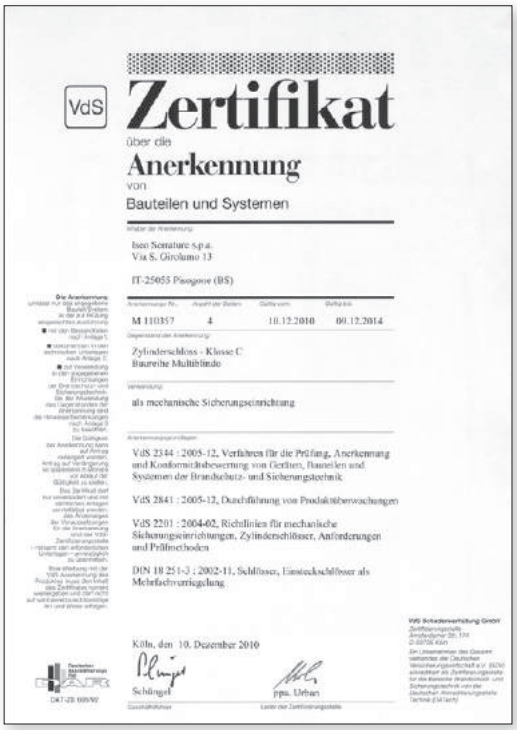

Light. When pressing the pushbutton the door opens and a sound signal is produced. When it closes, Multiblindo eMotion will automatically trigger the latchbolt only: a different and more flexible security level for a partial and fast locking.

Free. With this setting, Multiblindo eMotion keeps the latchbolt and deadbolts completely unlocked: the door will stay in a free-opening status, in the classic hold-open situation. Total freedom ensuring a free access both from inside and outside until a new setting is given.

Doors opening direction.

Multiblindo eMotion EXIT

The new electromechanical automatic lock Multiblindo eMotion EXIT with panic function has got the same features as the lock Multiblindo eMotion. The system is made up of the lock and the operating bar. A microswitch detects and signals the deadbolt status. From the outside it operates by key or the most advanced electronic access systems: fingerscan, keyboard, transponder, PIN-code.
From the inside it operates electronically in a simple and fast way through a normal keyboard. The end user can choose the locking mode according his security requirements: Total, Light, Free. The deadbolts and latchbolt are always operated by the panic bar.

It is certified

according to the EN 1125:08 standard in combination with its striking plates and operating bar Pro EXIT, with the following certification:

3	7	6	B	1	4	2	1	A	B

Pro EXIT **operating bar**

Operating bar on which a microswitch can be applied. It detects the emergency opening.
With AntiGerm antibacterial protection.

Set your time

The user can set the time span between the opening pulse and the automatic relocking of the door.

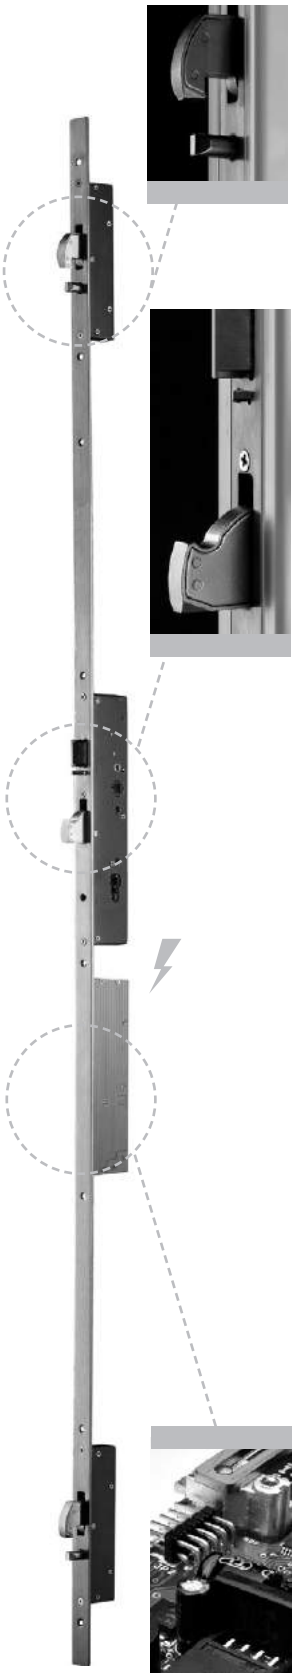

Multiblindo eMotion has three options allowing an instant opening as well as to choose the automatic relocking mode according to user's security requirements. It is operated through an electronic control for all the settings.

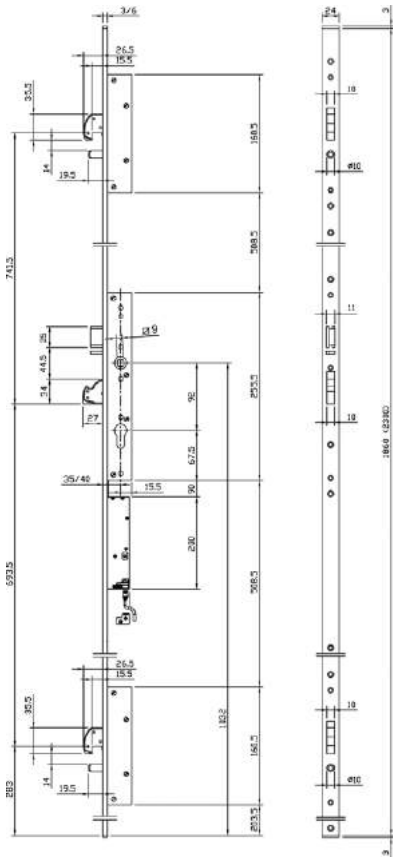

Total. When pressing the pushbutton the door opens and a sound signal is produced. When it closes, Multiblindo eMotion will automatically trigger the latchbolt and deadbolts: the sound feedback will indicate the total locking. Total security: this setting ensures your door the highest security.

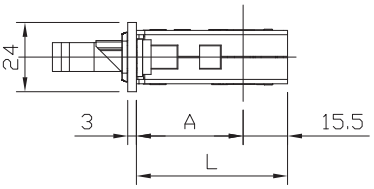

Light. When pressing the pushbutton the door opens and a sound signal is produced.
When it closes, Multiblindo eMotion will automatically trigger the latchbolt only: a different and more flexible security level for a partial and fast locking.

Free. With this setting, Multiblindo eMotion keeps the latchbolt and deadbolts completely unlocked: the door will stay in a free-opening status, in the classic hold-open situation.
Total freedom ensuring a free access both from inside and outside until a new setting is given.

SWISSDOOR
DØRTEKNIK FOR PROFESSIONELLE

Multiblindo Easy

Automatic lock

Multiblindo Easy

It is a Multiblindo by all means: same sizes and dimensions, same security level. But it is an all-new Multiblindo, **conceived with 3 different functions to be set by the end user.**
To use Multiblindo Easy you need to apply an external fixed knob or a pull handle; as a matter of fact, a "classic handle" would unlock the door (emergency function).

It has been designed and tested

according to the European standard prEN 15685.
It resists lateral forcing with a thrust of over 1,000 kg and a front load of over 600 kg.
The corrosion resistance is more than 240 hours in a saline environment.
Endurance: tested to over 200,000 opening and closing cycles under a 120N load.

Example of certification: lock Multiblindo Easy, models 7A32 – 7A34 – 7A36 – 7A38

3	X	8	B	0	G	7	3	0

Locking.

The outstanding feature of Multiblindo Easy is the automatic locking of the latchbolt and deadbolts, which comes into operation when the door is pulled close to the door jumb. The end user may change the operating mode by switching the selector placed on the lock front plate. A special patented device allows the deadbolts to come out of the cases only when the latchbolt goes into the striking plate for at least 3 mm. The latchbolt aligns perfectly the wing to the door jamb; this operation ensures the best condition for the free movement of the deadbolts.

Opening.

Outside opening: the deadbolts are unlocked with a single turn of the key in the opening direction; the latchbolt is unlocked with a further ¼ turn.
Inside opening: the deadbolts are unlocked with a single turn of the key in the opening direction; the latchbolt is unlocked with a further ¼ turn.
Latchbolt and deadbolts are unlocked with 45° lever rotation.

Lever block.

The lever operation inside is blocked with a single turn of the key in the closing direction.
The operation is restored with single turn of key in the opposite direction. To avoid incorrect or accidental use, the lever block operation is only allowed when the deadbolts are completely locked. This also ensures that:
- deadbolts automatic locking is fully completed
- deadbolts connecting rod has been blocked (an attack on one of the deadbolts does not damage the others). As far as security is concerned, the lever block prevents the opening from inside if required, or from outside in the event of a door breaking (i.e. glass frame doors).

In terms of safety it ensures a better exit control.

Total "0" **Deadbolts and latchbolt automatic locking**

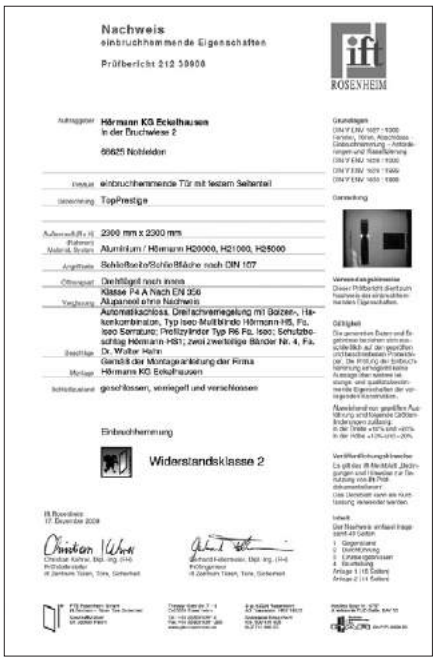

Light "1" **Locking by latchbolt only**

Free "2" **Setting without locking** (it allows to set the hold-open function)

MULTIPOINT mortice lock for metal frames, AUTOMATIC LOCKING OF THE LATCHBOLT AND 3 DEADBOLTS, **ROTATING HOOK DEVIATORS**. Central lock, centre distance mm 92, operating with European profile cylinder.
Right or left latchbolt, **non reversible**. Deadbolts and latchbolt operated by key or handle.
Lock and deviators deadbolts, mm 27 throw, with anti-drill and anti-cut cover plates in carbonitrided steel.
2 nylon end blocks for U-version. Fixing screws. Instruction sheet.

Accessories to be ordered separately:
Striking plates
U-front plate in stainless steel 24x6:
mechanical strikers 033232 - 033233
electric strikers 033242 - 033243
strikers for deviators 033167 - 033171
Flat front plate in stainless steel 24x3:
mechanical strikers 033230 - 033231
electric strikers 033240 - 033241
strikers for deviators 033165 - 033169

Multiblindo Easy EXIT

The automatic lock Multiblindo Easy EXIT with panic function has got the same features as the lock Multiblindo Easy. It is made up of the lock and the operating bar. When the door is pulled ajar the synchronisation device automatically locks the deadbolts ans the latchbolt, as soon as the wing is perfectly aligned. A microswitch detects and signals the deadbolt status.

It is certified

according to the EN 1125:08 standard in combination with its striking plates and operating bar Pro EXIT, with the following certification:

3	7	6	B	1	4	2	1	A	B

Pro EXIT **operating bar**

Operating bar on which a microswith can be applied. It detects the emergency opening.
With AntiGerm antibacterial protection.

Locking

Automatic locking of the deadbolts and latchbolt: they come into operation when the door is pulled close to the door jamb. The end user may change the operating mode by switching the selector placed in the lock front plate. A special patented device allows the deadbolts to come out of the cases only when the latchbolt goes into the striking plate for at least 3 mm.
The latchbolt aligns perfectly the wing to the door jamb: this operation ensures the best conditions for the free movement of the deadbolts.

Opening

Outside opening: the deadbolts are unlocked with a single turn of key in the opening direction; the latchbolt is unlocked with a further 1/4 turn.
Inside opening: the deadbolts are unlocked with a single turn of the key in the opening direction. The deadbolts and latchbolt are always unlocked with the operation of the panic bar.

Total "0" **deadbolts and latchbolt automatic locking**

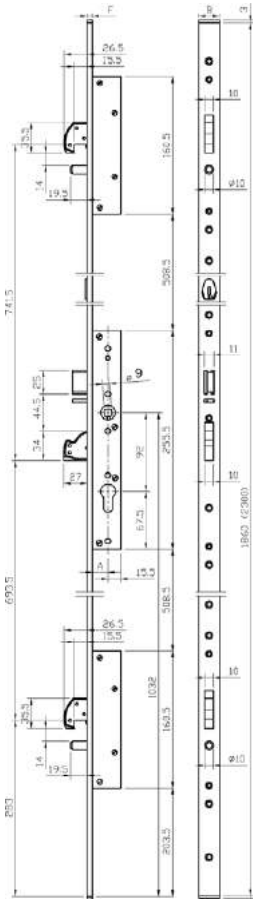

Light "1" **locking by latchbolt only**

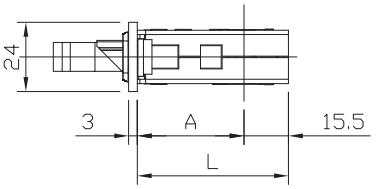

Free "2" **setting without locking**
(it allows to set the hold open function)

SWISSDOOR
DØRTEKNIK FOR PROFESSIONELLE

Multiblindo classic

Lock for metal frames

Multiblindo classic

It has been designed and tested

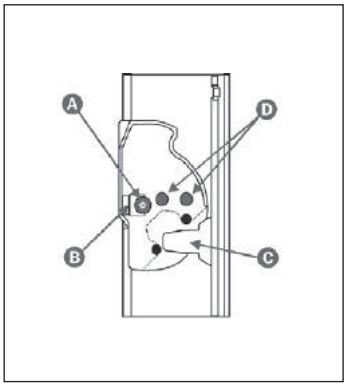

according to the European standards EN 12209:05 (lateral locking version) and prEN 15685 (3-point locking version).
It resists lateral forcing with a thrust of over 1,000 kg and a front load of over 600 kg.
The corrosion resistance is more than 240 hours in a saline environment.
Endurance: tested to over 200,000 opening and closing cycles under a 120N load.

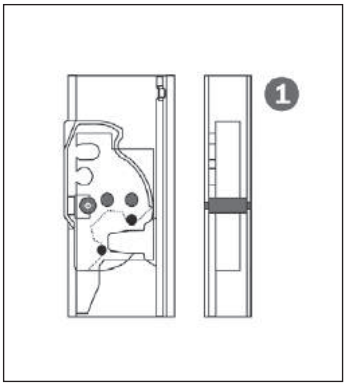

Example of certification lock Multiblindo, series 7955 - 7945 - 7991 - 79034

3	X	8	A	0	G	7	3	1

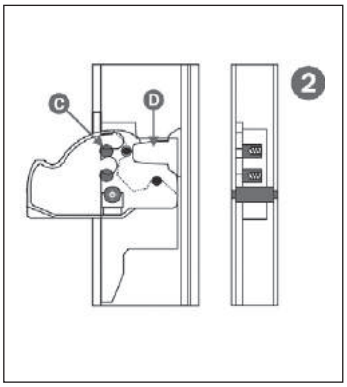

Adopting MULTIBLINDO, together with ISEO cylinders range, means reaching an extremely high security standard to the doors.
MULTIBLINDO's security features include:
- steel lock case, closed on all sides;
- reinforced deadbolts with carbonitrided steel layers for high cut and drill protection;
- new deadbolt system (patented) preventing cracking (fig. 2,3,4);
- external forces applied on one of the deadbolts have no effect on the other two, which means that any eventual cracking attempts would have to be repeated separately for each deadbolt.

A) DEADBOLT fulcrum pin
B) Programmed breaking point
C) Security pins
D) Movement transmission and DEADBOLT locking rod

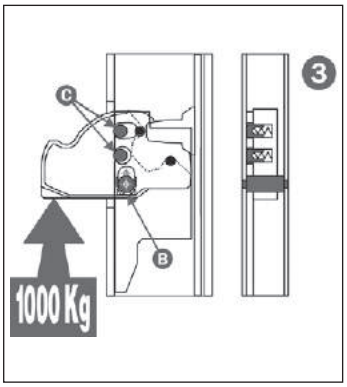

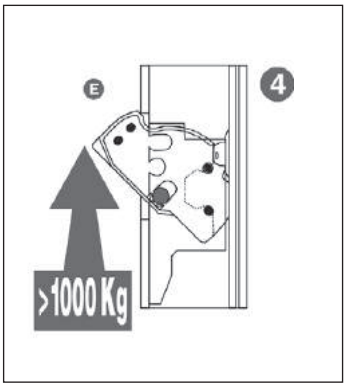

Open lock

Closed lock. Blocking is ensured by element "D", which opposes the deadbolt and secures it against the back wall of the lock case.
Pins "C" are not operating.

By appling an upwards force, equivalent to one metric ton, breaking point "B" yields letting pins "C" insert themselves into their respective spaces in the plate consolidated to the lock case. The deadbolt and the case fundamentally become one single body.

The deadbolt can no longer enter again the lock case when its rotation axis is moved, as it interferes with the front plate "E".

Multiblindo classic

Kurzbericht
Nr. 212 24161

ift ROSENHEIM

Auftrag	Prüfung der einbruchhemmenden Eigenschaften nach DIN V ENV 1627
Auftraggeber	**Tegtmeier GmbH & Co. KG Metallbauwerk** Oeynhausener Str. 40 32584 Löhne/Westfalen
Probekörper	
Prüfdatum	26. Juli 2001
Produktbezeichnung	„Tebau Therm 80"
Bauart	einflügelige Aluminiumrahmentür mit Seitenteil
Angriffseite	Schließseite / Schließfläche gemäß DIN 107
Außenabmessungen	1400 mm x 2100 mm (B x H)
Rahmenmaterial	Aluminium
Profilsystem	TT80
Konstruktionsfugen	Schattenfuge 4mm, unten 20 mm
Beschläge 1)	Schloss Fa. ISEO Multi Blindo nach DIN 12209 Klasse 5 mit Profilzylinder der Fa. Dom, Art.-Nr.: 25 500 91 sowie mit verdeckt liegendem Band der Fa. Tebau.
Verglasung	nach DIN 52290 - B1
Paneel	nach DIN 52290 – B5
Montage	Montageanleitung Stand Januar 2001, Blatt 1
Ausführungsvarianten	- Abweichungen von der geprüften Größe gemäß DIN V ENV 1627 in der Breite maximal + 10% und – 20 % und in der Höhe maximal + 10% und – 20 %. - weitere Ausführungsvarianten siehe Anlage 1, Blatt 1

Ergebnis
Der Probekörper erfüllt die Anforderungen an einbruchhemmende Türen der

Widerstandsklasse 3 nach DIN V ENV 1627 : 1999

Verwendung von ift-Prüfberichten
Entsprechend dem **ift**-Merkblatt und nur so lange, wie sich die Bauart des Produktes sowie der Inhalt und die Gültigkeit der Norm nicht ändern.

ift Rosenheim
20. September 2001

Dr. Helmut Hohenstein

MULTIBLINDO mortice lock for metal frames, **MODULAR, ROTATING DEADBOLT.**
Central lock, centre distance mm 92, operating with European profile cylinder.
Front plate with holes for additional deviators. Rotating deadbolt,
mm 27 throw with antidrill/anticut cover plates in carbonitrided steel.
Supplied with reversible and adjustable latchbolt. The latchbolt can be replaced with roller or cap for deadlocking only. Latchbolt/roller operated by key or mm 8 handle follower.
Built-in connecting rods between lock and deviators. 2 nylon end blocks for U-version.
Fixing screws. Instruction sheet.

Accessories to be ordered separately:
Rotating deadbolt deviator - ref. 790330000
Rotating hook deviator - ref. 790340000
Bottom-locking deviator - ref. 790310000

MULTIBLINDO mortice lock for metal frames, 3-POINT LOCKING, **DEVIATORS**, **ROTATING DEADBOLT**.
Central lock, centre distance mm 92, operating with European profile cylinder.
Mm 27 throw with anti-drill/anti-cut cover plates in carbonitrided steel.
Supplied with reversible and adjustable latchbolt. The latchbolt can be replaced with roller or cap for deadlocking only. Latchbolt/roller operated by key or mm 8 handle follower.
2 lateral-locking deviators, assembled, with rotating deadbolt mm 27 throw with antidrill/anticut cover plates in carbonitrided steel.
2 nylon end blocks for U-version. Fixing screws. Instruction sheet.

Accessories to be ordered separately:
Striking plates
Modular roller for latchbolt hole - ref. 040801/2/3/4/11/12/13/14/15
Modular cap for latchbolt hole - ref. 040810 - cod. 040816
Cylinder escutcheon - ref. 040809 - cod. 98.05.04/05/06
Anti-drill plate - ref. 040805. 25/30/35/40/45/50/55/60/65

DØRTEKNIK FOR PROFESSIONELLE

Perforza

Lock with sliding deadbolt

Performa

PERFORMA by ISEO has been conceived and developed to meet the requirements of the European market by adopting two different centre distances: 85 and 92 mm. It can be operated by a European profile cylinder with straight or 45° projecting DIN cam. The top and bottom lock housings incorporate low friction chamfered sliding deadbolts providing a perfect alignement into the keeps. The unique locking action of these chamfered bolts when combined with the latest generation of profiles helps maintain weather seal compression for better thermal insulation and energy saving.

ICIM

Certificazione di Prodotto
Product Certification

ISEO SERRATURE S.p.A.

It has been designed and tested

according to the European standards EN 12209:05 and prEN 15685:09.
It resists lateral forcing with a thrust of over 1,000 kg and a front load of over 600 kg.
The corrosion resistance is more than 240 hours in a saline environment.
Endurance: tested to over 200,000 opening and closing cycles under a 120N load.

Example of certification: multipoint lock Performa models 723 – 72E

3	X	8	A	0	G	6	0	3

It's compatible

The lockcase has a width of 15 mm and, therefore, suits any type of applications for different frames materials.

It's sealed

The lockcase is closed on all sides: this stops profile machining chips from entering the mechanism. The lock is equipped with a wheel-cam stopping device in case the cylinder is not present into the housing of lock.

Easy locking

The gear box allows for a smoother and easier operation whilst turning the key during opening and closing.

It's solid

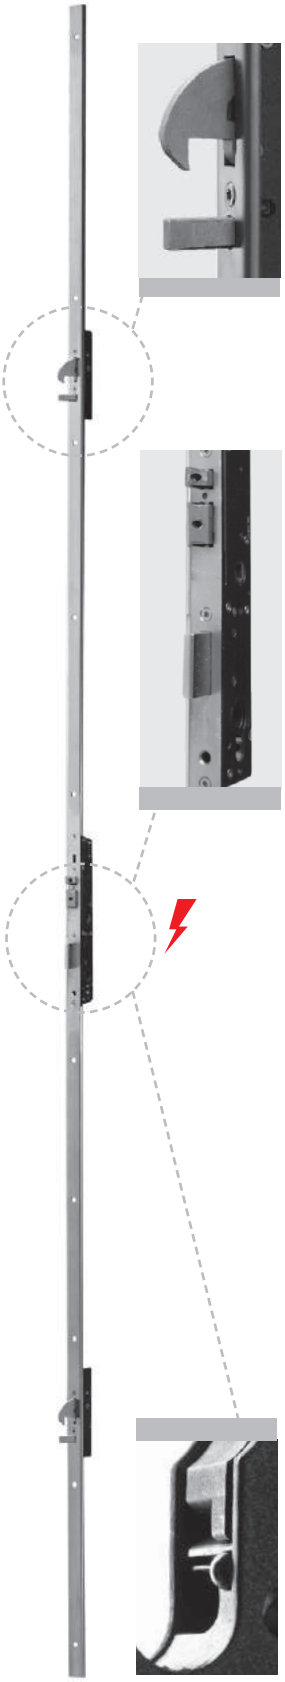

Version with hardened deadbolts available on demand, providing greater resistance against cutting and drilling.

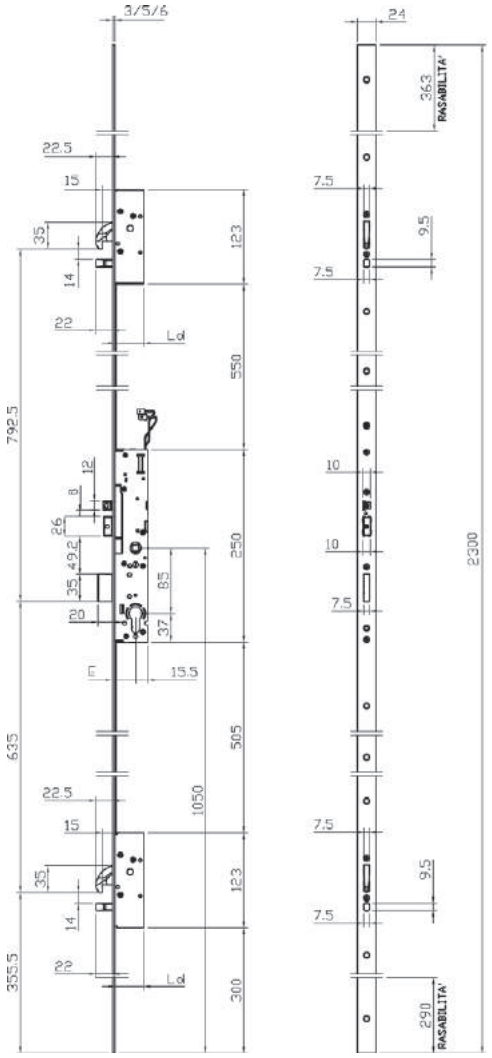

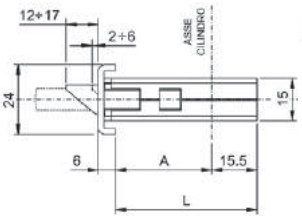

It's well equipped

PERFORMA is well equipped with accessories to modify the lock: with a latch, a roller or a blanking cap for DEADBOLT only action.
Such a versatile lock makes for a streamlined stockholding.

Top Exit DGT

Automatic lock

Top Exit DGT

Top Exit DGT is a smart closing device conceived and manufactured specifically for applications on metal frames in steel and aluminum.

Key points

The motorized movement of the deadbolts (and latchbolt) during both opening and closing operations is controlled by specific sensors and a powerful microprocessor, which guarantee constant security.

The lock software allows to manage the “hold open” function: the deadbolts are constantly unlocked allowing free entrance to anybody.

Top Exit DGT is available in three different versions that suit any application exigency:
- TYPE A with motorized deadbolts and adjustable roller latchbolt
- TYPE B with motorized deadbolts and mechanical latchbolt (manual operation)
- TYPE C with motorized deadbolts and latchbolt

All the versions can operate mechanically too, because the european cylinder and/or panic exit device operations don’t depend on power supply and impediments deriving from the contemporary operation of the motor.

The control unit allows the opening from exterior through accessories such as proximity readers, radio remote controls and electronic keys and through the connection to centralized access control systems.

SWISSDOOR
DØRTEKNIK FOR PROFESSIONELLE

Thesis 2.0

Electronic lock (dropbolt)

Thesis 2.0

Thesis 2.0 is a range of electro-mechanical locks which transforms a simple door in a smart access and makes it even safer and more functional thanks to its performances.
Unlike the traditional electric locks, its security status is automatically restored with a locking time which can be set according to any needs.
The Thesis 2.0 models ensure a high anti-intrusion security, and the opening operation can be controlled by transponders, contactless cards and/or PIN codes.
The range of Stylos credential readers and controllers dialog with Thesis 2.0 Standard in a direct way through Lockbus interface, i.e. without intermediate electronic devices.

Key Points

The technology and materials chosen for THESIS 2.0 Standard guarantee its durability, which is much longer than the standard requirements.

Innovative electronics with power reserve (booster) guaranteeing an efficient deadbolt movement in difficult operating conditions: even with 8 Volts only.

Power supply from 8 to 30Vdc 1A. Its operation is guaranteed also in complex installations and critical situations.
Flexible installation conditions and low power consumption.

Thesis 2.0 guarantees a trouble-free operation even if installed horizontally. It represents the ideal solution for automatic sliding doors.

The Lockbus interface allows the direct connection with Iseo Stylos Line credential readers, for a simple but effective access control management.

It can operate in interlock mode (manual or automatic) for bidirectional doors without any external control device.

Thesis 2.0 Range

Thesis 2.0 Standard

A steel deadbolt with a 20 mm extension ensures a high anti-intrusion security (level 3 according to EN12209 standard).

Available both Fail Secure mode (N.C. Normally Closed) and Fail Safe mode (N.O. Normally Open) versions.

Thesis 2.0 Standard Latchbolt

It has the same features of the Standard version. Thanks to its self-locking and self-ejecting latchbolt, it works also as a traditional mechanical security lock.
It guarantees door locking, even if in case of lack of power supply, always in maximum security and comfort.

A steel autolocking self-ejecting latchbolt with a 20 mm extension ensures a high anti-intrusion security (level 3 according to EN12209 standard).
The latchbolt ensures a typical mechanic lockcase functioning also in absence of the power supply. The door closing is always effective thanks to the latchbolt function.

Available only in Fail Secure mode (N.C. Normally Closed) version.

Thesis 2.0 Professional

It is the Heavy Duty version of the Thesis 2.0 Standard. It combines the functions of the standard version to the soundness and anti-manipulation resistance, which make it the ideal solution for professional installations where maximum passive security and high use frequency are required, such as shops, banks and public offices entrances.

The technology and materials chosen for THESIS 2.0 Professional guarantee its durability, which is much longer than the standard requirements (even over 1 million operating cycles).
A hardened steel deadbolt with a 18 mm diameter, and 22 mm extension and a 4 mm stainless steel front plate ensure a high anti-intrusion security (level 7 according to EN12209 standard).
The operation is guaranteed even in case of a residual lateral load up to 15N and of a bad door alignment. This is why it is at the top of the market.

Available both Fail Secure mode (N.C. Normally Closed) and Fail Safe mode (N.O. Normally Open) versions.

Thesis 2.0 Professional Mini

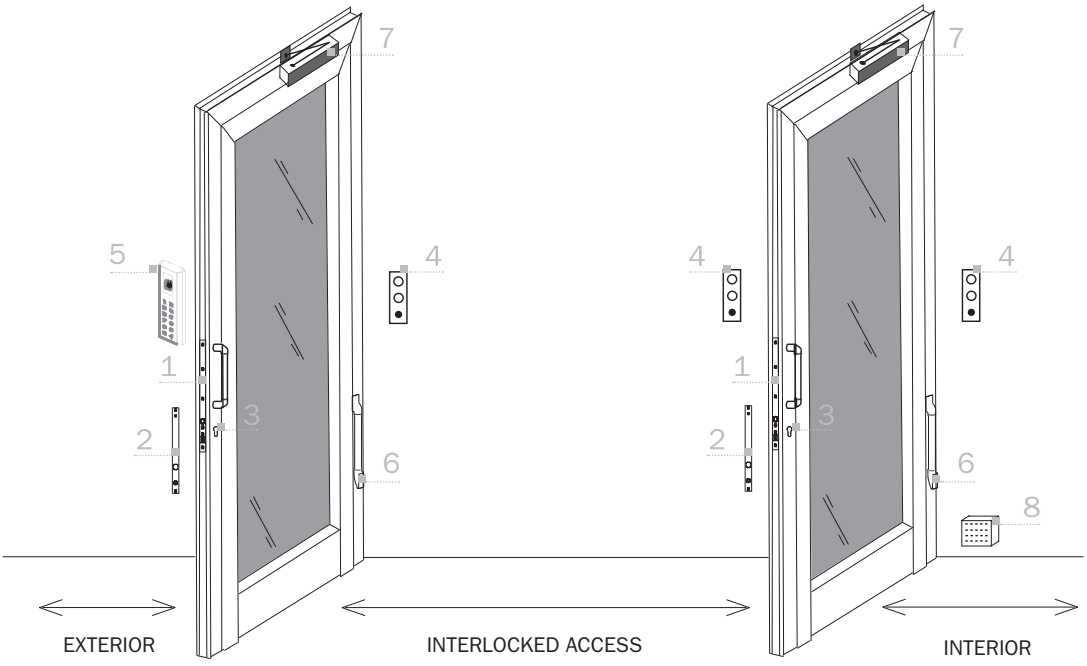

It has the same features as the Professional version but its case is smaller and it can't be operated through handle and cylinder. It is the ideal solution for installations where only the electric operation of the lock is required, eventually combined with other classic closing systems.

Available both Fail Secure mode (N.C. Normally Closed) and Fail Safe mode (N.O. Normally Open) versions.

Thesis 2.0

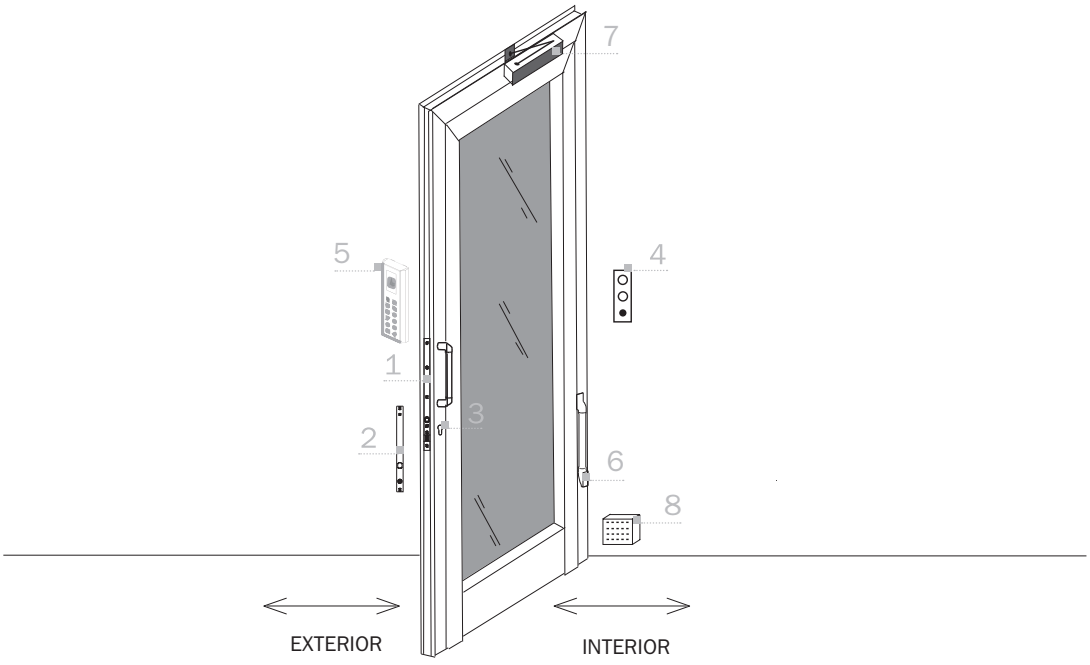

ON INTERLOCKED DOORS

1. Thesis 2.0 lock
2. Striking plate
3. European profile cylinder
4. Status indicator with pushbutton
5. Stylos reader
6. Concealed lead covers
7. Door closer
8. Power supply unit

Thesis 2.0

ON SINGLE DOORS

1. Thesis 2.0 lock
2. Striking plate
3. European profile cylinder
4. Status indicator with pushbutton
5. Stylos reader
6. Concealed lead covers
7. Door closer
8. Power supply unit

Thesis 2.0 Standard

It is certified

Thesis 2.0 Standard is conceived and manufactured in compliance with European standards EN 14846:08, with the following classification:

3	C	8	0	0	G	3	0/1	1	*

(*) 0 = in combination with STATUS INDICATOR
1 = in combination without STATUS INDICATOR

Thesis 2.0 Standard

Technical features

Backset: 25/30/35 mm

Deadbolt:
- hardened inox steel;
- cutting resistant (free rotating);
- Ø14 mm diameter;
- single throw;
- 20 mm extension.
- to prolong the life of the solenoid bolt the shape of the bolt guide has been improved by strengthening the collar.

European profile cylinder hole.

Handle follower (optional): 8 mm;
Centre distance between handle follower and cylinder: 85 mm

Front plate:
- inox steel;
- 25x371 mm – thickness 3 mm;
- door positioning sensor and alignment device.

Striking plate:
- Inox steel;
- 25x367 mm – thickness 3 mm;
- 2 oval fixing holes for 4 mm vertical regulation and a central hole for definitive fixing;
- adjustable depending on the distance between the lock and the striking plate;

Case dimensions:
- thickness 22 mm
- length 280 mm
- depth 38/43/48 mm

DC supply voltage range: 8÷30Vdc.
Max. absorbed current power in operation: 1A.
CC power supply min. characteristics: 8÷30Vdc15W.

Opening control:
- opto-isolated input 8÷24Vdc/12Vac;

Max voltage and current applicable to signalling relay:
- 24Vdc 1A;
- 120Vac 0.5A.

Programmable status signal:
- secured door status;
- door status;
- bolt status;
- command for motorized door opener.

Lockbus connection:
- data communication and power supply on the same 3 wire connections;
- maximum length 100 mt;
- secure devices authentification;
- encrypted data transmission for high security against hacking.

Thesis 2.0 Standard

Adjustable timings:
- door opening time (courtesy time): 1÷180 sec. (15 sec. default);
- delayed closure time (at closing of the door): 1÷60 sec. (1 sec. default).

Environmental features:
- operating temperature: -20°C÷+60°C;
- storage temperature: -25°C÷+70°C;
- protection level (IP grading): IP44;

Reference Standard: EN 14846:2008;
grading: 3 C 8 0 0 G 3 0 1
3 C 8 0 0 G 3 1 1 (in combination with STATUS INDICATOR).

Options and Versions:

With and without handle follower

Operating modes in case of power failure:
- Fail Secure mode (N.C. Normally Closed)
- Fail Safe mode (N.O. Normally Open)

The new implementation will allow the mechanical key override retraction to be fully mechanical and not reliant on a power source to assist with the bolt withdrawal.

Operating software:
- single door;
- bidirectional doors with manual interlock functionality (*);
- bidirectional doors with automatic interlock functionality (*);

Lockbus

LOCAL BUS

All devices belonging of the THESIS range are compatible with ISEO Lockbus.

Lockbus is a powerful multipoint bus sharing data transmission and power supply on the same 3-wire connection for utmost flexibility, easy installation and consequently, cost optimization.

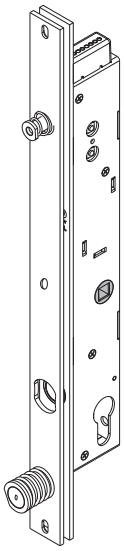

Lockbus highlights:

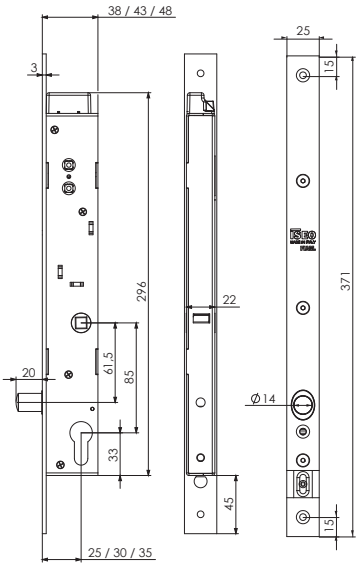

Data transmission and power supply on the same 3-wire connection up to 100 m;

Self-adjusting power supply from 8Vdc to 30Vdc;

Secure device authentication (among readers and actuators) and encrypted data transmission for high security against manipulation.

Thesis 2.0 Standard

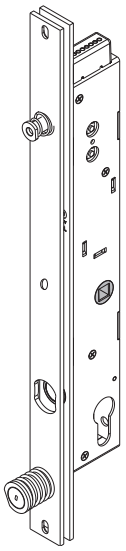

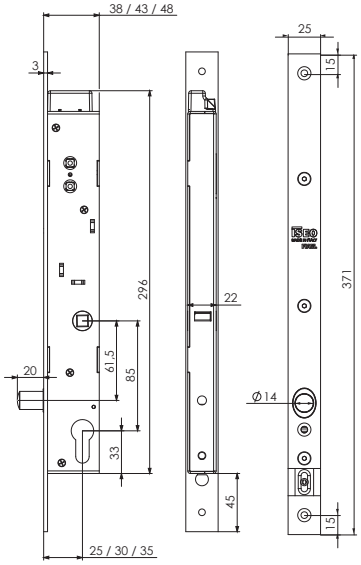

DROPBOLT FAIL SECURE WITH HANDLE FOLLOWER.
Hardened steel bolt, Ø14 mm diameter, one throw, 20 mm excursion.
Stainless steel front plate with alignment device.
Stainless steel striking plate with alignment device and in line frame sensor.
Handle follower 8 mm.
European profile cylinder hole.
Fail Secure mode.
Package: 1 dropbolt, 1 striking plate, instruction manual, screws, connector with rubber protection, handle follower.

Handle follower/cylinder centre distance 85 mm

	Code	Single package		Multiple package	Min. ord.
Single door software. Backset 25 mm.	**07500802521**	1	-	1

Thesis 2.0 Standard

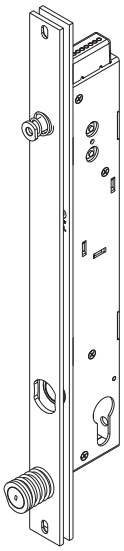

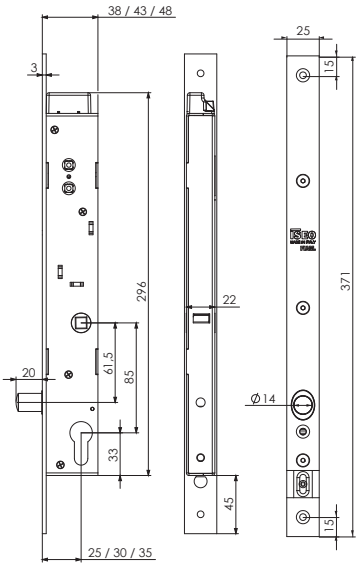

DROPBOLT FAIL SAFE WITH HANDLE FOLLOWER.
Hardened steel bolt, Ø14 mm diameter, one throw, 20 mm excursion.
Stainless steel front plate with alignment device.
Stainless steel striking plate with alignment device and in line
frame sensor. Handle follower 8 mm.
European profile cylinder hole.
Fail Safe mode. The new implementation will allow the mechanical key override retraction
to be fully mechanical and not reliant on a power source to assist with the bolt withdrawal.
Package: 1 dropbolt, 1 striking plate, instruction manual, screws,
connector with rubber protection, handle follower.

Handle follower/cylinder centre distance 85 mm

Thesis 2.0 Standard Latchbolt

Thesis 2.0 Standard Latchbolt has the same features of the Standard version. Thanks to its self-locking and self-ejecting latchbolt, it works also as a traditional mechanical security lock. It guarantees door locking, even if in case of lack of power supply, always in maximum security and comfort.

Key points

The technology and materials chosen for THESIS 2.0 Standard guarantee its durability, which is much longer than the standard requirements.

Innovative electronics with power reserve (booster) ensuring an efficient bolt movement in difficult operating conditions: even with 8 Volts only.

A steel autolocking self-ejecting latchbolt with a 20 mm extension ensures a high anti-intrusion security (level 3 according to EN12209 standard).

The latchbolt ensures a typical mechanic lockcase functioning also in absence of the power supply.

The door closing is always effective thanks to the latchbolt function.

Power supply from 8 to 30Vdc 1A. Flexible installation conditions and low power consumption.

The Lockbus interface allows the direct connection with Iseo Stylos Line credential readers, for a simple but effective access control management.

Available only in Fail Secure mode (N.C. Normally Closed).
It can operate in interlock mode (manual or automatic) for bidirectional doors without any external control device.

It is certified

Thesis 2.0 Standard Latchbolt is conceived and manufactured in compliance with European standards EN 14846:08, with the following classification:

3	C	8	0	0	G	3	0/1	1	*

(*) 0 = in combination with STATUS INDICATOR
1 = in combination without STATUS INDICATOR

Thesis 2.0 Standard Latchbolt

Technical features

Backset: 25/30/35 mm

Latchbolt:
- hardened inox steel;
- Ø14 mm diameter;
- self-ejecting (mechanical);
- 20 mm extension;

European profile cylinder hole

Handle follower (optional): 8 mm;
Centre distance between handle follower and cylinder: 85 mm

Front plate:
- inox steel;
- 25x371 mm – thickness 3 mm;
- door positioning sensor and alignment device;

Striking plate:
- Inox steel;
- 25x330 mm – thickness 3 mm;
- 2 oval fixing holes for 4 mm vertical regulation and a central hole for definitive fixing;
- adjustable depending on the distance between the lock and the striking plate;

Case dimensions:
- thickness 22 mm
- length 280 mm
- depth 38/43/48 mm

DC supply voltage range: 8÷30Vdc.
Max. absorbed current power in operation: 1A.
CC power supply min. characteristics: 8÷30Vdc 15W.

Opening control:
- opto-isolated input 8÷24Vdc /12Vac;

Max voltage and current applicable to signalling relay:
- 24Vdc 1A;
- 120Vac 0.5A;

Programmable status signal:
- secured door status;
- door status;
- latchbolt status;
- command for motorized door opener;

Lockbus connection:
- data communication and power supply on the same 3 wire connections;
- maximum length 100 mt;
- secure devices authentification;
- encrypted data transmission for high security against hacking;

Adjustable timings:
- door opening time (courtesy time): 1÷180 sec. (15 sec. default);

Thesis 2.0 Standard Latchbolt

Environmental features:
- operating temperature: -20°C÷+60°C;
- storage temperature: -25°C÷+70°C;
- protection level (IP grading): IP44;

Reference Standard: EN 14846:2008;
grading: 3 C 8 0 0 G 3 0 1
3 C 8 0 0 G 3 1 1 (in combination with status indicator)

Options and versions:

With and without handle follower

Operating modes in case of power failure:
- Fail Secure mode (N.C. Normally Closed)
- Fail Safe mode (N.O. Normally Open)

Operating software:
- single door;
- bidirectional doors with manual interlock functionality (*);
- bidirectional doors with automatic interlock functionality (*);

(*) direct connection between the 2 lock with encrypted communication

Thesis 2.0 Professional

Thesis 2.0 Professional is the Heavy Duty version of the Thesis 2.0 Standard. It combines the functions of the standard version to the soundness and anti-manipulation resistance, which make it the ideal solution for professional installations where maximum passive security and high use frequency are required, such as shops, banks and public offices entrances. Thesis 2.0 transforms a simple door in a smart gate and makes it even safer and more functional because it restores automatically its security status thanks to the delayed time locking to be set directly from the end user according to his different needs. A steel deadbolt with a 22 mm extension ensures a high anti-intrusion security, and the opening operation can be controlled by transponders, contactless cards and/or PIN codes. The range of Stylos credential readers and controllers dialog with Thesis 2.0 Professional in a direct way through Lockbus interface, i.e. without intermediate electronic devices, creating flexible and effective electronic access control solutions.

Key points

The technology and materials chosen for THESIS 2.0 Professional guarantee its durability, which is much longer than the standard requirements (even over 1 million operating cycles).

A hardened steel deadbolt with a 18 mm diameter, and 22 mm extension and a 4 mm stainless steel front plate ensure a high anti-intrusion security (level 7 according to EN12209 standard).

The operation is guaranteed even in case of a residual lateral load up to 15N and of a bad door alignment. This is why it is at the top of the market.

Innovative electronics with power reserve (booster) guaranteeing an efficient deadbolt movement in difficult operating conditions: even with 8V only!

Power supply from 8 to 30Vdc 1A. Its operation is guaranteed also in complex installations and critical situations. Flexible installation conditions and low power consumption.

Thesis 2.0 Professional guarantees a trouble-free operation even if installed horizontally. It represents the ideal solution for automatic sliding doors.

The Lockbus interface allows the direct connection with Iseo Stylos Line credential readers, for a simple but effective access control management.

Available both Fail Secure mode (N.C. Normally Closed) and Fail Safe mode (N.O. Normally Open) versions.

It can operate in interlock mode (manual or automatic) for double doors without any external control device.

Thesis 2.0 Professional Mini

Thesis 2.0 Professional Mini has the same features as the Professional version but its case is smaller and it can't be operated through handle and cylinder. It is the ideal solution for installations where only the electric operation of the lock is required, eventually combined with other classic closing systems. A steel deadbolt with a 22 mm extension ensures a high anti-intrusion security, and the opening operation can be controlled by transponders, contactless cards and/or PIN codes. The range of Stylos credential readers and controllers dialog with Thesis 2.0 Professional Mini in a direct way through Lockbus interface, i.e. without intermediate electronic devices, creating flexible and effective electronic access control solutions.

Key points

The technology and materials chosen for THESIS 2.0 Professional Mini guarantee its durability, which is much longer than the standard requirements (even over 1 million operating cycles).

A hardened steel deadbolt with a 18 mm diameter, a 22 mm extension and a 4 mm stainless steel front plate ensure a high anti-intrusion security (level 7 according to EN12209 standard).

The operation is guaranteed even in case of a residual lateral load up to 15N and of a bad door alignment. This is why it is at the top of the market.

Innovative electronics with power reserve (booster) guaranteeing an efficient deadbolt movement in difficult operating conditions: even with 8V only!

Power supply from 8 to 30 VDC 1A. Its operation is guaranteed also in complex installations and critical situations. Flexible installation conditions and low power consumption.

Thesis 2.0 Professional Mini guarantees a trouble-free operation even if installed horizontally. It represents the ideal solution for automatic sliding doors.

The Lockbus interface allows the direct connection with Iseo Stylos Line credential readers, for a simple but effective access control management.

Available both Fail Secure mode (N.C. Normally Closed) and Fail Safe mode (N.O. Normally Open) versions.

It can operate in interlock mode (manual or automatic) for double doors without any external control device.

Max voltage and current applicable to signalling relay:
- 24 Vdc 1A;
- 120 Vac 0.5A;

Programmable status signal:
- secured door status;
- door status;
- latchbolt status;
- command for motorized door opener;

Lockbus connection:
- data communication and power supply on the same 3 wire connections;
- maximum length 100 mt;
- secure devices authentification;
- encrypted data transmission for high security against hacking;

Adjustable timings:
- door opening time (courtesy time): 1÷180 sec. (15 sec. default);
- delayed closure time (at closing of the door): 1÷60 sec. (1 sec. default).

Thesis 2.0 Professional Mini

Environmental features:
- operating temperature: -20°C÷+60°C;
- storage temperature: -25°C÷+70°C;
- protection level (IP grading): IP44;

Reference Standard: EN 14846:2008;
grading: 3 H 8 0 0 E 7 0 1
3 H 8 0 0 E 7 1 1 (in combination with status indicator)

Options and versions:

Operating modes in case of power failure:
- Fail Secure mode (N.C. Normally Closed)
- Fail Safe mode (N.O. Normally Open)

Operating software:
single door;
bidirectional doors with manual interlock functionality (*);
bidirectional doors with automatic interlock functionality (*);

(*) direct connection between the 2 lock with encrypted communication.

Lockbus

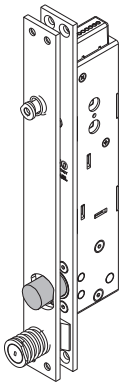

LOCAL BUS

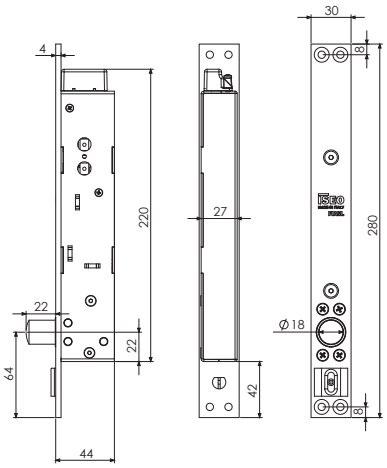

All devices belonging of the THESIS range are compatible with ISEO Lockbus.
Lockbus is a powerful multipoint bus sharing data transmission and power supply on the same 3-wire connection for utmost flexibility, easy installation and consequently, cost optimization.

Lockbus highlights:

Data transmission and power supply on the same 3-wire connection up to 100 m;
Self-adjusting power supply from 8Vdc to 30Vdc;
Secure device authentication (among readers and actuators) and encrypted data transmission for high security against manipulation.

Thesis 2.0 Professional Mini

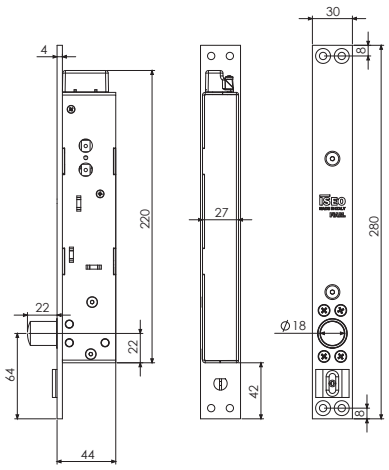

DROPBOLT FAIL SECURE WITHOUT HANDLE FOLLOWER.
Hardened steel bolt, Ø18 mm diameter,
one throw 22 mm excursion.
Stainless steel front plate with alignment device.
Stainless steel striking plate with alignment device and in line frame sensor.
Fail Secure mode.
Package: 1 dropbolt, 1 striking plate, instruction manual, screws, connector with rubber protection.

	Code	Single package		Multiple package	Min. ord.
Single door software.	**07800020021**	1	-	1	
Manual interlock software.	**0780M020021**	1	-	1	
Automatic interlock software.	**0780A020021**	1	-	1

3 keys for cross-key cylinder Ref. 91.01.75

	Code	Single package	Multiple package	Min. ord.
Backset 25	**713.11.25**	1	-	1
Backset 30	**713.11.30**	1	-	1
Backset 35	**713.11.35**	1	-	1

Mortice lock for metal frames, operating with European profile cylinder.
One throw, three locking point, front plate in steel, zinc-plated 25x3 mm.
2 keys for cross-key cylinder Ref. 91.01.75

	Code	Single package	Multiple package	Min. ord.
Backset 25	**713.14.25**	12	-	12
Backset 30	**713.14.30**	12	-	12
Backset 35	**713.14.35**	12	-	12

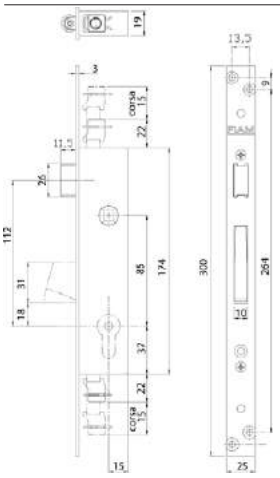

Mortice lock for metal frames, operating with European profile cylinder.
One throw, three locking point, front plate in steel, zinc-plated 25x3 mm.
1 KA key for cross-key cylinder Ref. 91.01.75

	Code	Single package	Multiple package	Min. ord.
Backset 25	**713.34.25**	12	-	12
Backset 30	**713.34.30**	12	-	12
Backset 35	**713.34.35**	12	-	12

Locks for iron frames

	Code	Single package	Multiple package	Min. ord.

Mortice lock for metal frames, operating with European profile cylinder.
One throw, bolt and reversible latch, three locking point,
front plate in steel, zinc-plated 25x3 mm
2 cross-keys cod. 91.01.75

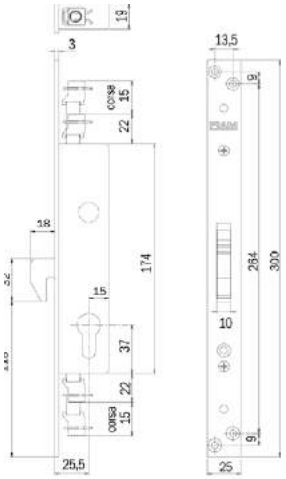

Backset 25	**711.14.25**	12	-	12
Backset 30	**711.14.30**	12	-	12
Backset 35	**711.14.35**	12	-	12

Mortice lock for metal frames, operating with European profile cylinder.
One throw, bolt and reversible latch, three locking point,
front plate in steel, zinc-plated 25x3 mm
1 cross-key KA cod. 91.01.75

Backset 25	**711.34.25**	12	-	12
Backset 30	**711.34.30**	12	-	12
Backset 35	**711.34.35**	12	-	12

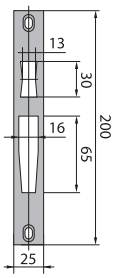

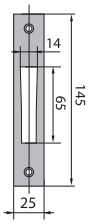

Mortice lock for metal frames, operating with European profile cylinder.
One throw, three locking point, front plate in steel, zinc-plated 25x3 mm.
Cylinder to be ordered separately.

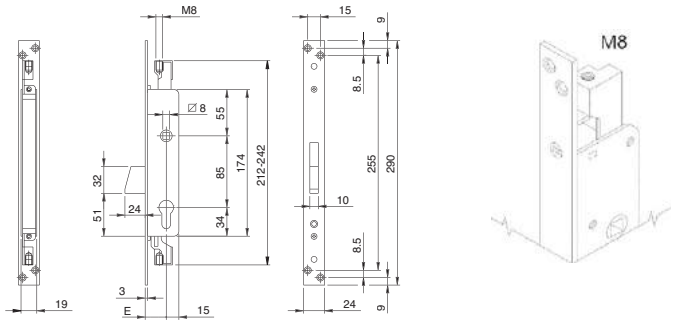

Backset 25	**714.04.25**	12	-	12
Backset 30	**714.04.30**	12	-	12
Backset 35	**714.04.35**	12	-	12

Electa for shutters stainless steel front plate

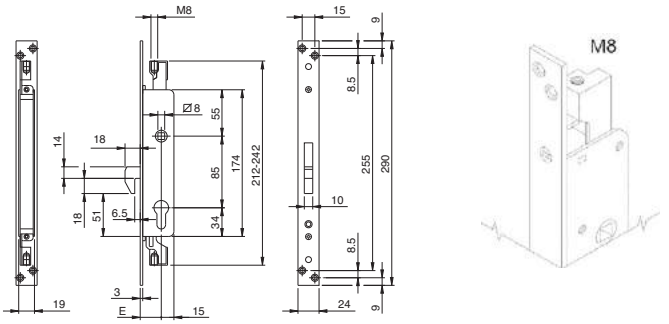

Mortice lock for metal frames, **SHUTTERS**, 3-POINT LOCKING, operating with European profile cylinder. Pre-assembled M8 rod connection.
Rods travel range mm 15. Front plate mm **290x24x3** in STAINLESS STEEL.
Rotating DEADBOLT with mm 24 throw.
Throw by handle follower mm 8, handle locked by cylinder.
1 escutcheon.
Accessories to be ordered separately:
2 tips Ø 10 for threaded rods M8 - ref. 990836
Pins, tips and rod-guiding plates for Ø 8 rods - ref. 990837
Striking plate in STAINLESS STEEL - ref. 038020

	Code	Single package	Multiple package	Min. ord.
Backset mm 25	**783380252**	1	10	10
Backset mm 30	**783380302**	1	10	10
Backset mm 35	**783380352**	1	10	10

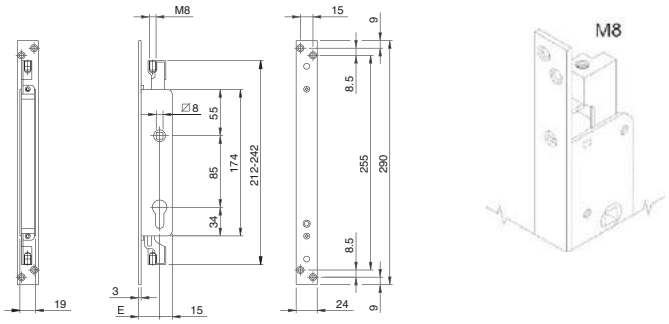

Mortice lock for metal frames, **SHUTTERS**, 3-POINT LOCKING,
operating with European profile cylinder. Pre-assembled M8 rod connection.
Rods travel range mm 15. Front plate mm **290x24x3** in STAINLESS STEEL.
HOOK DEADBOLT, CLEARANCE 6,5, with mm 18 throw.
Throw by handle follower mm 8, handle locked by cylinder.
1 escutcheon.
Accessories to be ordered separately:
2 tips Ø 10 for threaded rods M8 - ref. 990836
Pins, tips and rod-guiding plates for Ø 8 rods - ref. 990837
Striking plate in stainless steel - ref. 038020

	Code	Single package	Multiple package	Min. ord.

741N centre distance 85

The 741N series mortice locks with **85 centre distance** can be installed on metal frames and have been redesigned with better performance features and with a wider range of products. Together with Iseo cylinder, they provide doors with different levels of security. The 741N series locks are in compliance with EN 12209:2016 standard.

Closed case and the fixing holes

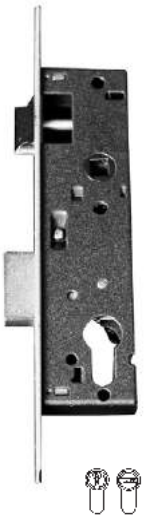

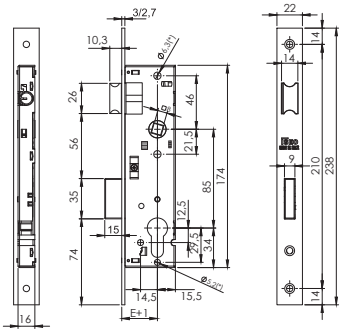

Main features:

- Painted steel case, closed on all sides to prevent the accidental introduction of machining chips from entering the mechanism
- Reversible latchbolt
- 15 mm deadbolt, 1 throw
- 2 fixing holes, 21.5 mm below and 46 mm above the handle
- Compatible with European profile cylinders
- Latchbolt operated by handle and key
- Latchbolt and deadbolt flush with front plate
- 85 mm centre distance
- 8 mm handle follower
- 21, 26, 31, 36 mm backsets
- 22 mm square front plate

Front plate finish
- Chrome-plated steel
- Stainless steel

741N Locks for metal frames

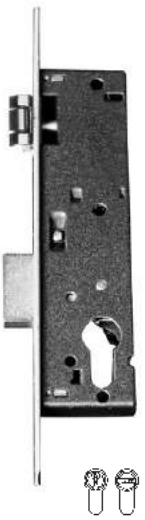

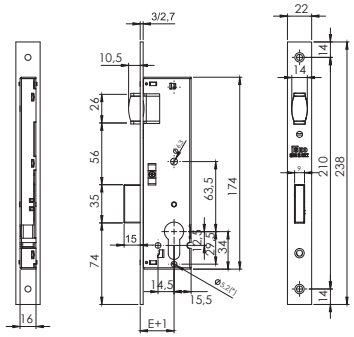

Closed case mortice lock for metal frames, operating with European profile cylinder.

Backset mm 90 — **983901BFZ** — 1 — 10 — 10

Code | Single package | Multiple package | Min. ord.

Mortice locks
zinc-plated front plate mm 25

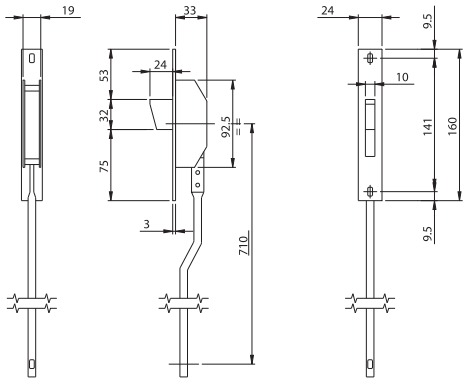

Double-bit mortice lock for metal frames. 3-POINT LOCKING. Supplied with M8 rods screwed connections. 2 KEYS **mm 79**.
Backset 90 mm Front plate in zinc-plated steel **240x25x3**. Case height mm 82. Four mm 9 throws.
SEPARATE REVERSIBLE LATCHBOLT. Latchlocking by key or handle follower mm 8. 2 escutcheons.
2 escutcheons. Fixing screws. **PACKED IN NYLON BAGS.** (Key blank 990800)
Accessories to be ordered separately:
Striking plates

Backset mm 90	**983901BFZR**	1	10	10

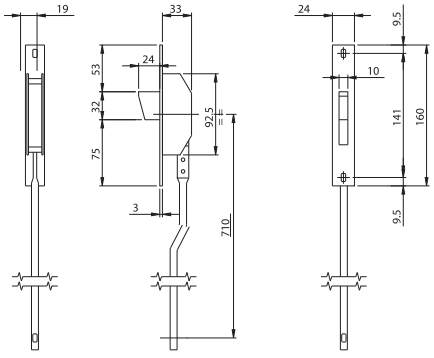

Deviators for 3-point lateral locking. Internal rods to be used with locks with clutch connection.
Front plate mm **160x24x3** in STAINLESS STEEL. Rotating DEADBOLT mm 24 throw. Rod-guiding pins.
Screws with roses. Instruction sheet.

	780253	1	5	5

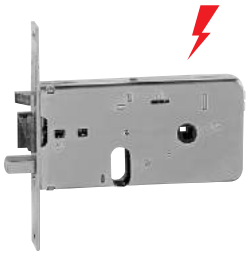

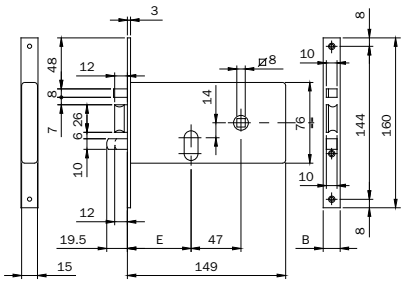

Deviators for 3-point lateral locking. Internal rods to be used with locks with clutch connection.
Front plate mm **160X22X3** IN ZINC-PLATED STEEL. Rotating DEADBOLT with mm 24 throw.
Rod-guiding pins. Screws with roses.

	780253BFZ	1	5	5

Electric mortice locks zinc-plated front plate

Code | Single package | Multiple package | Min. ord.

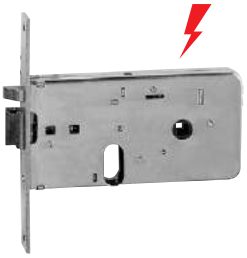

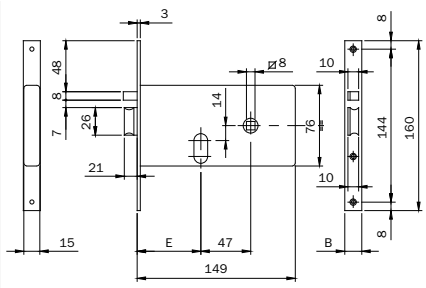

Zinc-plated electric mortice lock for metal frames operating with oval cylinder. **12Vac**.
Case mm 76 center distance 47. Zinc-plated front plate **160x16x3**. Two throws.
SELF-LOCKING LATCHBOLT WITH SEPARATE LOADING SPRING.
Instruction sheet. Cylinder fixing screw.

Backset mm 60	**5506010**	1	10	10
Backset mm 70	**5507010**	1	10	10

Zinc-plated electric mortice lock for metal frames operating with oval cylinder. **12Vac**.
Case mm 76 center distance 47. Zinc-plated front plate **160x20x3**. Two throws.
SELF-LOCKING LATCHBOLT WITH SEPARATE LOADING SPRING.
Instruction sheet. Cylinder fixing screw.

Backset mm 60	**5506020**	1	10	10
Backset mm 70	**5507020**	1	10	10

Zinc-plated electric mortice lock for metal frames operating with oval cylinder. **12Vac**.
Case mm 76 center distance 47. Zinc-plated front plate **160x16x3**.
SELF-LOCKING LATCHBOLT WITH SEPARATE LOADING SPRING. Hold-open device.
Instruction sheet. Cylinder fixing screw.

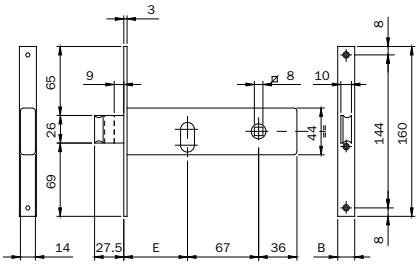

Backset mm 60	**5516010**	1	10	10
Backset mm 70	**5517010**	1	10	10

Zinc-plated electric mortice lock for metal frames operating with oval cylinder. **12Vac**.
Case mm 76 center distance 47. Zinc-plated front plate **160x20x3**.
SELF-LOCKING LATCHBOLT WITH SEPARATE LOADING SPRING. Hold-open device.
Instruction sheet. Cylinder fixing screw.

Certificazione di Prodotto
Product Certification
038BE/2
ISEO SERRATURE S.p.A.

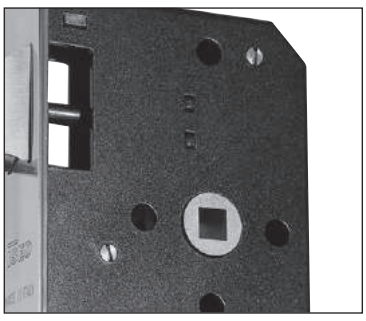

ATTESTATO DI CONFORMITÀ
CERTIFICATE OF CONFORMITY
2193 - CPD - 2010

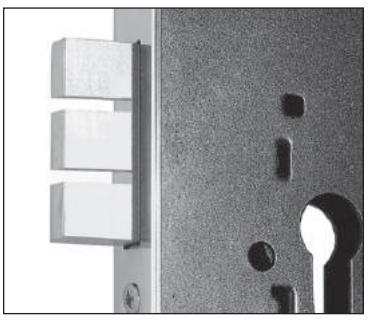

The mortice lock series 291 has obtained the product certification **038BE/1** (except for the version with roller and deadbolt only) and the certificate of conformity **CE 2193.** It is available in different finishings and locking versions. In conjunction with ISEO cylinders it provides high security to the doors.

Main features:

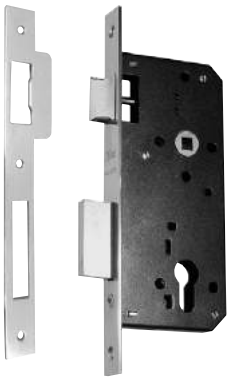

- steel closed lockcase on all sides: this prevents profile machining chips from entering the mechanism;
- two throws standard deadbolt or two throws anti-break and anti-saw deadbolt;
- reversible latchbolt or roller;
- center distance mm 85;
- 6 fixing holes for escutcheon and security plates;
- front plate rounded or squared mm 22, in: 24 KT gold plated brass, polished and painted brass, chrome-plated and polished brass, nickel-plated satin brass, bronze-plated and brushes brass;
- front plate rounded or squared mm 24, in stainless steel;
- operating with European profile cylinder or double handle follower.

All the updated certificates can be downloaded from our web site:
www.iseoserrature.it

Infilare 200N

The mortice lock series 200N has obtained the product certification **102BE/0** in compliance with the standard **UNI EN 12209:05.**

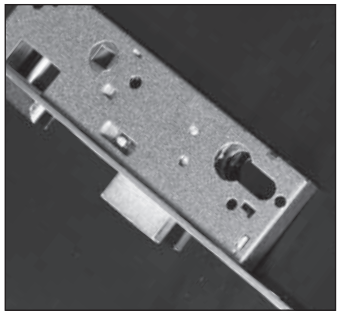

The mortice locks series 200N are available in different finishes and locking versions. In conjunction with ISEO cylinders they provide different levels of security to the doors.

200N series main features:
- Painted steel lockcase closed on all sides: this prevents profile machining chips from entering the mechanism.
- 6 fixing holes for escutcheons and security plates.
- Reversible latchbolt or roller.
- Deadbolt 20 mm, 2 throws.
- Operating with European profile cylinder or double handle follower (service doors).
- Latchbolt operated by handle and key.
- Center distance mm 85.
- Handle follower mm 8.
- Backset 40, 45, 50, 60, 70 mm.
- Front plate rounded or squared mm 22.

Front plate finishes:
- Gold-plated steel
- Brass-plated steel
- Chrome-plated steel
- Stainless steel

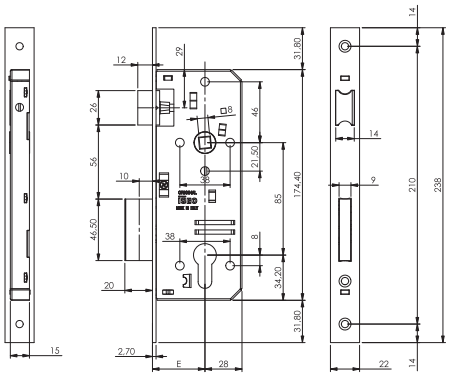

200N series main features backset 25, 30, 35:
- Painted steel lockcase closed on all sides: this prevents profile machining chips from entering the mechanism.
- Reversible latchbolt.
- Deadbolt 15 mm, 1 throws.
- 2 fixing holes 21,5 mm below and 46 mm above from the handle.
- Operating with European profile cylinder.
- Latchbolt operated by handle and key.
- Center distance mm 85.
- Handle follower mm 8.
- Backset 26, 31, 36 mm.
- Front plate rounded or squared mm 22.

Front plate finishes:
- Brass-plated steel
- Gold-plated steel on request

Locks for armoured doors

x1R Smart

x1R Smart

x1R SMART is a motorised electronic lock specifically designed for security doors. It combines the solidity of a mechanical lock with the versatility of electronic control via smartphone, RFID tag or keypad.

Key points

Opening occurs with the aid of a motor or the "Single Action" quick release and closing occurs through motorised action controlled by a next-generation microprocessor. In case of lack of power supply the operation of the deadbolt is guaranteed by the traditional movement of keys, equipped with a security system that is able to disconnect motorisation during operation of the mechanical cylinder.

Locks of the x1R Smart series are interchangeable with the most common mechanical locks as they use the same mechanical accessories. The electronic accessories' "plug and play" electrical connections make installation extremely easy.

The system is managed through Iseo Argo, an app available on iOS and Android which you can use to connect your smartphone via Bluetooth 4.0 LE and manage all functions.

It can be interfaced with the Iseo access control platform or a third-party system through opto-isolated Input/Output connections which can be used to control the operation modes and states for opening and closing. By using the lockbus connection with proprietary protocol it is possible to have a direct and secure connection with the Iseo range devices.

All models are available with different projections and bolt centre-to-centre distances for a vast interchangeability with mechanical versions. Escutcheons are available in various finishes.

Thanks to the solidity of the mechanical structure it is classified at the maximum grade (7) for anti-intrusion protection (EN12209).

CERTIFICAZIONE DI PRODOTTO
PRODUCT CERTIFICATION
ICIM

It is certified

x1R Smart has been designed and manufactured in compliance with European standards EN14846:2008 with the following classification:

3	M	8	0	0	M	7	1	1

MAIN FUNCTIONS

Smart device with Bluetooth 4.0 LE radio interface.
Opening and programming via Argo App on iOS and Android devices.
Motorised opening and closing of deadbolts and latchbolt
Quick opening from inside the room with "Single Action" handle (optional)
Opening via PIN code, RFID Credentials 13.56 Mhz (ISO 14443A-ISO 14443B) Classic Mifare, Plus, Desfire
Opening via European profile cylinder (EN1303, DIN 18252)
Battery powered low-energy consumption device (optional)
Wake up upon RFID card detection (patented)
Battery charge status detection
Light and sound signals
Hold open function (office function) without extra energy consumption
5 different operation modes can be set by the user
Real Time Clock/Calendar
Memory storage of 300 users
Memory of the last 1000 events
Software that can be update by the user in the field
Compatible with the main mechanical locks for security doors

x1R Smart

TECHNICAL FEATURES

Backset: 63 mm
Deadbolt projection: 3 mm to 13 mm
Deadbolts:
- In chrome-plated steel
- Cylindrical section ø 18 mm
- Versions with 3 pistons (37 mm) and 4 pistons (28 mm)
- 2 throws
- Total excursion 30 mm

Latchbolt:
- In chrome plated steel
- Reversible hand
- Cylindrical section ø 20 mm
- Adjustable projection (+6 mm)

Door contacts:
- Two front contacts in chrome-plated brass
- Rectangular section 10x8
- Reversible hand
- Adjustable projection from 0 to 15 mm
- Nylon stop with chrome plated brass contacts
- Connection for power supply from 8 to 30 VDC 30W

Mechanical controls:
- Set up for European profile cylinder (EN1303, DIN 18252)
- Cylinder fixing system through support side screw
- Handle follower: section 8 mm
- Centre distance between handle follower and cylinder hole 85 mm

Lock fixings:
- Mortice lock with front plate in chrome-plated steel (dimensions H 410 mm x L 35 mm x W 3 mm)
- Rim lock with 4 fixing screws M6
- Rim lock with 4 fixing screw nuts M6

Lockcase dimensions:
- Width 30 mm
- Height 262 mm
- Depth 136 mm

Top and bottom rod attachments:
- In zinc-plated steel
- Maximum projection 53 mm (upper), 50 mm (lower)
- Rods projection 20 mm

Power supply:
- Battery operated with 6 1.5 VDC alkaline batteries (duration around 30,000 opening cycles)
- Power supply from 8 to 30 VDC 30W
- Consumption at rest 0.05A – Maximum (forced) 2.5A

x1R Smart

Connections:
- Bluetooth LE 4.0 radio module (integrated into external control modules)
- External control module with RFID reader 13.56 Mhz (ISO 14443A-ISO 14443B) Classic Mifare, Plus, Desfire
- External control module with backlit keypad and RFID reader 13.56 Mhz (ISO 14443A-ISO 14443B), Classic Mifare, Plus, Desfire
- Two button internal control module (encrypted communication)
- Opto-isolated opening control 8-30 VDC/VAC
- Power from 8 to 30 VDC 30W

Relay status signal configurable from the App:
- Door secured (in frame door + deadbolts and latchbolt out)
- Opening control for motorised door operator

Software:
- Argo app for smartphone
- Free and available for iOS and Android devices
- OEM development platform available via SDK

Programming:
- Master Card set for programming
- With Argo App (User Management, Door parameters, Events logs, Utility)
- Lock firmware and peripheral devices can be updated on-site

Opening credentials:
- Card, key fob and Iseo transponder keyring
- Card 13.56 Mhz (ISO 14443A-ISO 14443B) Classic Mifare, Plus, Desfire
- Pin code (from 4 to 14 digits)
- Programming of a maximum of 300 credentials

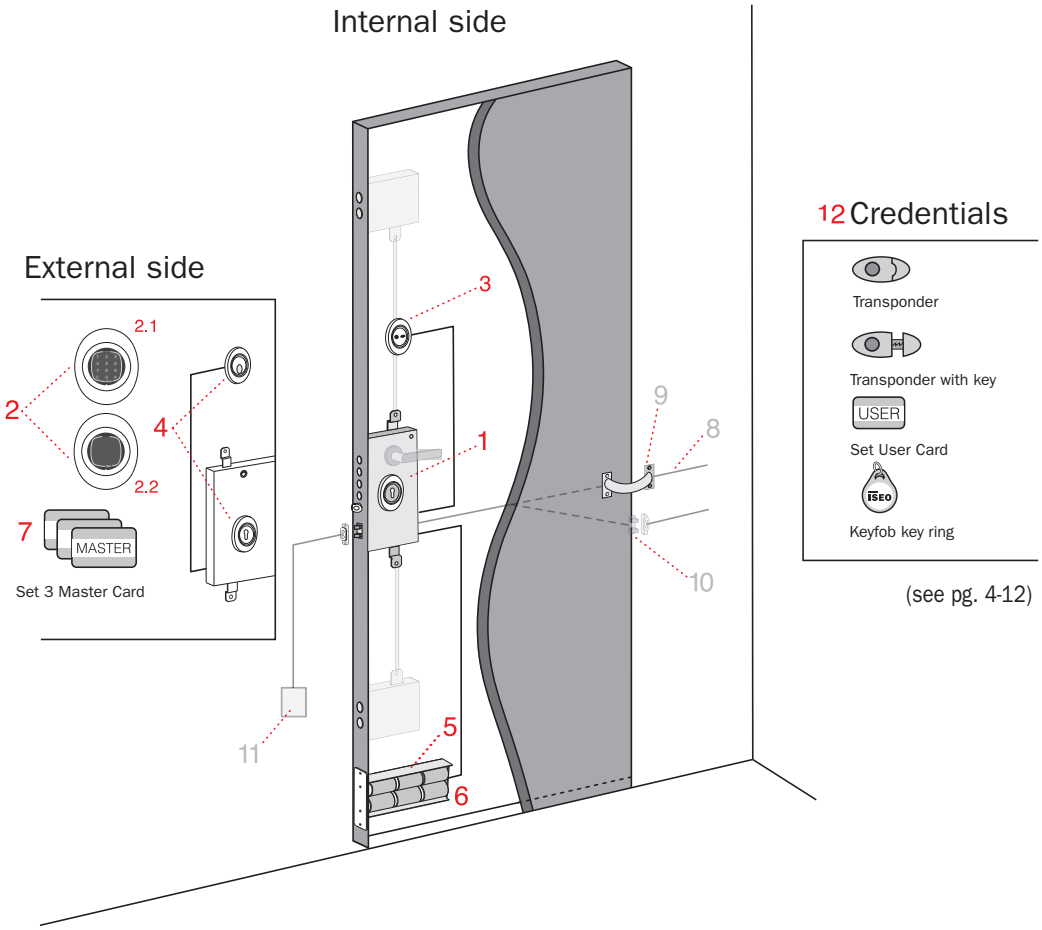

Environmental characteristics:
- Operating temperature -20°C +70°C
- Storage temperature -25°C +75°C
- IP lock protection grade: IP44

Reference standards UNI EN 14846:2008
- Classification 3M800M711

Options and versions:
- Standard or with “Single Action” quick opening device
- Rim or mortice version
- 3 pistons (37 mm) and 4 pistons (28 mm)
- Bolt projection 3 mm or 13 mm
- Battery operated (with mains electricity power supply optional)
- Mains electricity (with optional back-up batteries)
- Connection through 8-pole multifunction cables
- Remote control connection through bipolar cable and adjustable door contact.

x1R Smart

Rim version

Motorised electronic lock with European profile cylinder.
Deadbolts in chrome-plated steel ø 18 mm, projection 30 mm
Reversible latchbolt ø 20 mm, adjustable projection.
Handle follower 8 mm for latchbolt operation.
Top and bottom attachments for rods for additional closures.
Rim fixing with 4 passing screws or screw nuts.
Set up for M6 passing screws for cylinder protection fixing.
Reversible door sensor with adjustable projection, including alignment device.
Supplied with: lock, door sensor, cylinder fixing screws, assembly instructions.

SWISSDOOR
DØRTEKNIK FOR PROFESSIONELLE

Locks for armoured doors

x1R Easy

x1R Easy

x1R, available in mortice and rim versions, is an electronic motorized lock specifically developed to be installed on armoured doors.

Key points

It works with an electric motor controlled by a powerful microprocessor and the deadbolt action is always guaranteed by the mechanical operation of the key, even in case of power supply failure.

x1R locks have the same sizes and accessories as the mechanical locks, so they are interchangeable; thanks to simply electric connections the installation is very easy.

All versions are reversible, have different deadbolt extensions and centre distances.

Escutcheons are available in three different finishes.

Thanks to its structure it is classified at the maximum level (7) for the anti-intrusion protection (EN12209).

CERTIFICAZIONE DI PRODOTTO
PRODUCT CERTIFICATION

It is certified

x1R is conceived and manufactured in compliance with European standards EN14846 with the following classification:

3	M	8	0	0	M	7	1	1

Technical features

Central lock with top and bottom rods connector.

Versions with 3 or 4 deadbolts diameter 18 mm.

European profile cylinder hole.

Handle follower 8 mm.

Backset 63 mm.

Centre distance 85 mm.

Power supply:
- battery (6 batteries 1,5 Vdc)
- power supply unit from 9 to 14 Vdc

5 function modes to be set by the end user.

RFID cards/keys reader frequency 125 Khz.

Numerical keyboard (optional).

Opening by external control (remote control, pushbutton, etc.)

Keys or master and user code programming.

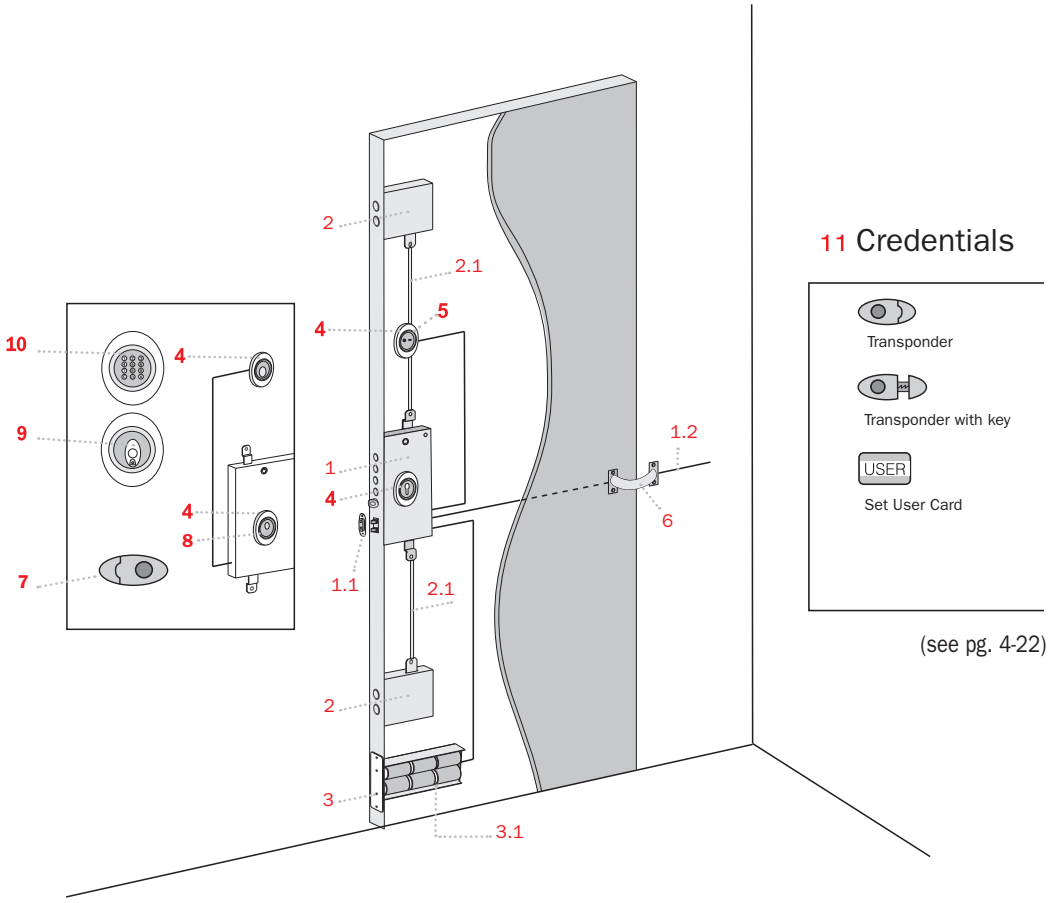

Keyboard for opening and programming (from inside).

In line frame sensor.

Operating temperature: -10°C ÷ +60°C

Locks for armoured doors

Serie 600

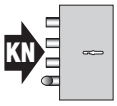

All **600G e 600GF series cylinder** locks are equipped with a deadbolt movement **mechanism** with gear wheels. This system raises the quality standards to a market leading position, such as:
- cylinder rotation with minimal effort
- silent movement
- very high cyclic durability
- no wear of the cylinder cam
- impossibility of key catching due to insufficient rotation
- compatible with cylinders of various origin

All **600 series cylinder locks with gear mechanism** comply with grade 7 (maximum) of standard EN12209 in relation to "property security".

All **600 series cylinder** have side screws to fix the cylinder. This is the most widespread system and as well as being very practical it provides strong support to the cylinder which, being completely enclosed in its casing, has higher resistance compared with classic fixing with frontal screws.

All **600 series cylinder Double Bit locks** have 6 independent gorges and a mentonnet in carbo-nitrided steel that have a special profile with an anti-manipulation system i.e. effective protection against opening attempts without break-in using picklocks and/or manipulation tools. This feature raises the security standards to a leading position on the market.

All **600 series cylinder Double Bit locks** with the deadbolt reinforcement system "H" (on request) reach grade 7 (maximum) of the standard EN12209 in relation to "property security". Locks with the deadbolt reinforcement system (optional) and with the anti-manipulation system (standard) are recognised as an "anti-burglar" system.

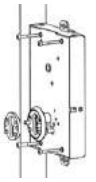

All **600 series cylinder Double Bit locks** can be rekeyable i.e. the construction keys and/or first property keys can be replaced by new keys that exclude the previous keys, for more security and your own peace of mind. This operation, which is simple, quick and therefore extremely private, can be carried out directly by the user in just a few seconds with the door open, without replacing internal parts of the lock nor disassembling panels, escutcheons etc.

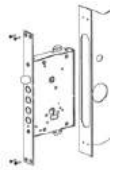

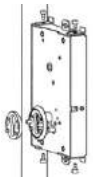

All **600 series cylinder Double Bit locks** are protected against "power keys". This is a key-shaped tool made from highly resistant material which is used to break the blocking elements of a lock. For this reason the deadbolt movement plate has a special structure in which the dragging element has a section for "controlled breakage" which prevents unauthorized opening.

All **600 series cylinder Double Bit locks** have several configurations to adapt themselves to various types of doors.
-**"D" and "G"**: locks with latchbolt at the bottom, handle at the top, key hole in the centre
-**"DF" and "GF"**: locks with latchbolt at the top, handle in the centre, keyhole at the bottom
-**"DP" and "GP"**: combined locks with latchbolt at the bottom, handle at the top, keyhole in the centre and service lock at the bottom
-**"DFP" and "GFP"**: combined locks with latchbolt at the top, handle in the centre, keyhole at the bottom and service lock at the top

Lock fixing types: rim, mortice, lateral screw nuts

K

TK System

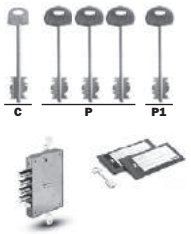

For double bit locks. The rekeyable TK system allows you to disable the construction key (which only operates the latch and the first two throws). With the door open the owner key is inserted. After a complete locking (4 throws), it replaces and definitively cancels the construction key, which cannot be used anymore.

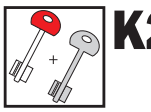

K1

TK1 System

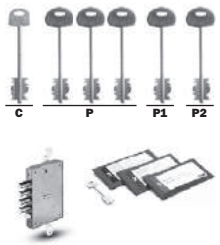

For double bit locks. Locks equipped with TK1 system are supplied with a construction key, three owner keys and another owner key which are protected by sealed package.
The construction key, which is different for each lock, operates the latch and the first two throws to ensure high security even after having completed construction works of the house.
After having inserted the owner keys into the lock and performed a complete locking (4 throws), the owner of the house definitively disables the construction key, making it unusable for anyone.
In case of theft or loss the second owner key can be used with the same procedure. The keys used previously cannot be used anymore.
The TK1 system is available on all 600 series double bit locks.

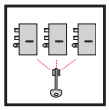

K2

TK2 System

For double bit locks. Locks equipped with TK2 system are provided with a service key and three first level owner keys, one second level owner key and one third level owner key which are all protected in a sealed package.
The service key operates the latchbolt and the first two throws and is normally used by a person whose access to the house should be considered limited or temporary.
The first level owner keys allow the home owner to close and open the lock, and if necessary, temporarily prevent access to the holder of the service key. When the lock is completely closed (4 throws) use of the service key is in fact inhibited. If you want to enable access using the service key while maintaining security of the house, lock the door with only 2 throws. In case of theft or loss, inserting the second level owner key into the lock and locking with 4 throws, the home owner definitively disables all keys used previously, thus rendering them unusable for anyone.
With the same procedure you can use the third level owner key. The keys used previously will therefore be unusable.
The TK2 system is available on all 600 series double bit locks.

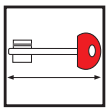

Z

Unified construction key system

For double bit locks. Patented system that allows the use of a unified construction key for latchbolt operation. The key will be automatically disabled once the owner keys have been used. There are 2 options:
1. Key excluded from the system
2. Unified construction key
Applicable to items 608D, 608D-73, 608D-89, 618D, 608DP, 618DP.

Serie 600

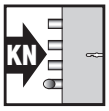

C

Key length

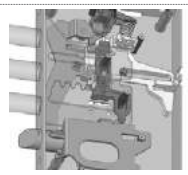

Double bit locks are provided with keys of standard length 110 mm. However shorter keys of 95mm (cod. 50.00.95) are also available. In versions with the 95 mm key the key guide code 201.00.608D.00 is only supplied on request.

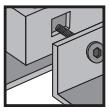

H

Deadbolt reinforcement system

For double bit locks. This system allows you to increase the capacity of the mentonnet pin and consequently the deadbolt's resistance to axial load, in case of force, up to 6KN, reaching security grade 7 (maximum) EN12209:2005.

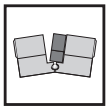

D

Side fixing system

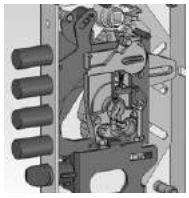

For all 600 series locks. Set up for side fixing with screw nuts and M6 screws.

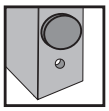

J

(Self Locking System)

For cylinder locks. This special system operates automatically in case of forced extraction of the cylinder. It prevents the retraction of the deadbolt, even when the cylinder is completely out. The system is irreversible, once it is inserted the lock remains blocked.
This system determines the right or left hand of the lock.

F

Front cylinder fixing

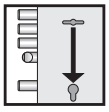

Cylinder fixing with front screws.
Using a front screw which blocks the cylinder, it is possible to fix it while maintaining the case support.
The system can be supplied for 600GF mono-system or combined versions.

R

Deadbolt with anti-cut reinforcement

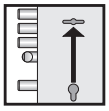

For cylinder locks with traditional mechanism.
To increase the lock's resistance there are three anti-cut tempered steel pins inserted into the pistons.

B

"Dependent block" version

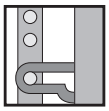

For combined locks. "Dependent block" version.
Once closed, the primary lock is blocked by the secondary lock. It is impossible to operate the primary lock even by using the original key. The secondary lock can only be operated if the primary lock is in a locked position. For locks with primary double bit keys it is useful to ensure higher security against housebreaking with tampering tools, for locks with primary cylinder keys it is useful to ensure absolute security for when you want to temporarily prevent access even to the holders of an enabled key, whether they are the legitimate owner or whether your keys have been lost or stolen.

I

"Independent block" version

For combined locks. "Independent block" version.
Just like the "B" function with the difference that the secondary lock is independent of the primary lock.

L

"Limiting device" version

For combined locks. "Limiting device" version.
The two locks are completely independent. The secondary lock can be operated even if the primary lock is in the open position. Additionally, if locked with only one throw, acts as an opening limiting device. Similar to version P, it has the the security limiting device function in addition.

X

"Night lock" version

For combined locks. "Night lock" version.
Once locked, the primary lock is blocked by the operation of the secondary lock. In this case it is impossible to operate the primary lock even by using the original key. The secondary lock can only be operated if the primary lock is in a closed position, but does not slide the deadbolt since it is lacking and acts only as a safety block. It is a similar example to the B version, but since it works with an internal half cylinder (which is operated only from the inside and which cannot be seen or attacked from the outside), it has a better guarantee against break-ins.

Panic and emergency exit devices

DOUBLE SAFETY: NO PANIC, NO BACTERIA

In line with its attention to safety, ISEO has decided to add this measure to a device which is always present in public environments and in all those places where hygiene and healthcare is a basic requirement: hospitals, clinics, treatment
homes, but also child care centres and nursery schools.

Therefore, the panic function is enriched with the antibacterial protection, AntiGerm*, whose performance is certified by Padova University Molecular Medicine Department.

The antibacterial treatment action is permanent and does not require special maintenance. The constant release of silver ions ensures top efficiency throughout the product life, even in case of surface scratches.

*
Antibacterial protection for panic exit devices and accessories (except for Stainless steel/PVD finishes).

Panic exit devices

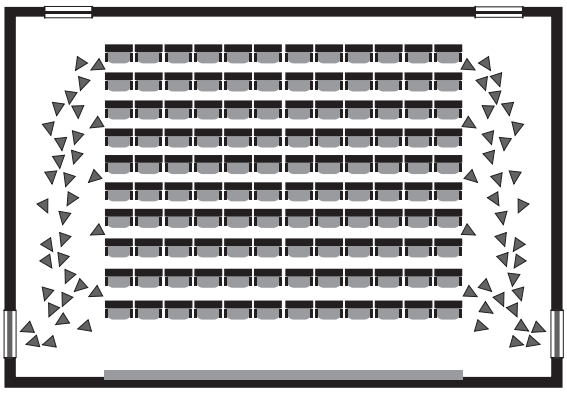

Standard

EN 1125:2008

All panic exit devices in compliance with standard EN 1125 are conceived to be used in panic situations.

The aim of the standard requirements is mainly to ensure a reliable and safe evacuation through a door making use of the minimum effort and with a single swing of the door, without any prior knowledge of the door device.

1121

How to read the marking EN 1125:2008

Not suitable for use on fire/smoke doors	3	7	6	0	1	4	2	2	A	A
Suitable for use on fire/smoke doors	3	7	6	B	1	4	2	2	A	A
	Category of use	Durability	Door mass	Suitability for use on fire/smoke resistant doors	People's safety	Corrosion resistance	Goods' security	Bar projection	Type of bar operation	Field of door application

Category of use. There is only one category which refers to a high frequency of use where there is little incentive to exercise care, i. e. where there is a chance of an accident and misuse.

Durability. There are two grades of durability.
grade 6 = 100,000 operations
grade 7 = 200,000 operations

Door mass. There are three door mass categories:
grade 5 = up to 100 kg
grade 6 = up to 200 kg
grade 7 = over 200 kg

Suitability for use on fire/smoke resistant doors. There are three fire/smoke resistance categories:
grade 0 = not suitable for fire/smoke resistant doors
grade A = suitable for smoke resistant doors
grade B = suitable for fire/smoke resistant doors

People's safety. There is only one category representing the maximum grade, since panic exit devices must ensure people's safety.

Corrosion resistance. There are two categories as per prEN1670:
grade 3 = 96 h (high resistance)
grade 4 = 240 h (very high resistance)

Goods' security. Only one grade of security shall be used: the security requirements are secondary to those of safety.

Bar projection. There are two categories:
grade 1 = bar projection up to mm 150 (large projection)
grade 2 = bar projection up to mm 100 (standard projection)

Type of bar operation. There are two types of operations:
A = panic exit device with "push-bar" operation (Idea)
B = panic exit device with "touch-bar" operation (Push-Bar)

Field of door application. There are three categories:
A = single door, double door: active or inactive leaf
B = single door only
C = double door, inactive leaf only.

For further information please refer to EN1125:2008 standard.

ICIM CERTIFIED PRODUCT

CE 1121

Warning

The field of application of these panic exit devices is limited to following:

Maximum door mass	Maximum door height	Maximum door width	Temperature interval
200 Kg	2520 mm	1320 mm	-10°C +60°C

The limits indicated above are identified by EN1125 standard. ISEO Serrature declares that the performances of the devices and their accessories are in compliance with the requirements of the standard, for doors with mass max. 200 kg, height max. 3400 mm and width max. 1500 mm.

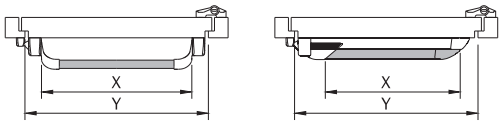

Fig. 1

The effective length (dimension X) of the bar shall be as near as possible to the effective width (dimension Y) of the door for which the device is intended, but never less than 60% (see Fig.1)
The door leavers and frames must be made of a material with sufficient rigidity to ensure that any distortions that occur during use can not exceed 5 mm in any position. The device must be fitted to the door leaf using materials that guarantee a tensile strength for each screw of >1,5KN.

Products certifications

ISEO Serrature has been awarded by Warrington Certification Limited (WCL) the certificate of conformity with EN 1125:08 standard allowing to apply the CE mark on panic exit devices, compulsory from 01/04/2003.
Idea panic exit devices have already obtained the Voluntary Product Certification by an independent organisation, ICIM, as provided for in EN 1125:08.
The ICIM voluntary certification establishes stricter requirements than the CE mark.

All the updated certificates can be downloaded from our web site: www.iseoserrature.it

Push SIRENA

Panic exit device with acoustic alarm.
When the alarm is on, the device emits a strong acoustic signal (90dB) every time the bar is pressed, thus providing the emergency exit with further security against thefts and/or unauthorized opening. It is compatible with ISEO **Push** range and can be easily mounted in retrofit on panic exit devices already installed.
The battery operation without external power allows for a quick, easy and cost-effective installation.
A selector connected to a key-operated European single profile cylinder (included) is used to program the functions and set the device status (alarm off, alarm on, courtesy).

Device functions and features:
- "Break" function to exit without alarm.
- Alarm reset only by key.
- Acoustic signals. 2 Led signals showing devices status and battery charge.
- Powered by 2 AA alkaline batteries (over 2 years' life without alarm)
- 3-level discharged battery signal allowing for scheduled replacement
- Selector compatible with European single profile cylinders (size 30+10) with 8-position DIN cam.

Acoustic alarm device kit for ISEO Push range

DØRTEKNIK FOR PROFESSIONELLE

Pad

Emergency exit devices with pushing plate

1121

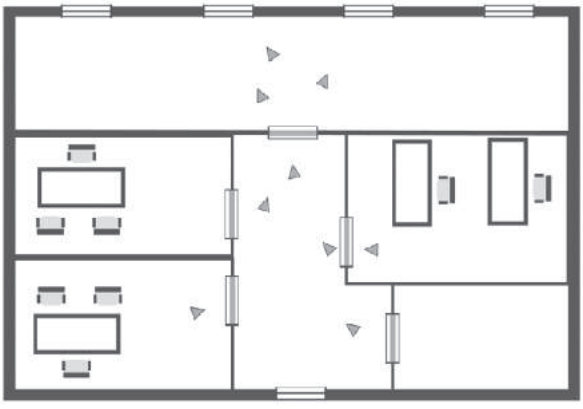

Standard

EN 179:2008

Emergency exit devices in compliance with standard EN 179 are conceived to be used where there is a very low probability for panic situations to happen, people are aware of the use of the emergency exit device and qualified for it.

The aim of the standard requirements is mainly to ensure a reliable and safe evacuation through a door making use of the minimum effort, even though a prior knowledge of the door device might be necessary.

1121

Pad: how to read the marking EN 179:2008

Not suitable for use on fire/smoke doors	3	7	6	0	1	4	4	2	B	A
Suitable for use on fire/smoke doors	3	7	6	B	1	4	4	2	B	A
	Category of use	Durability	Door mass	Suitability for use on fire/smoke resistant doors	People's safety	Corrosion resistance	Goods' security	Bar projection	Type of bar operation	Field of door application

Category of use. There is only one category which refers to a high frequency of use where there is little incentive to exercise care, i. e. where there is a chance of an accident and misuse.

Durability. There are two grades of durability:
grade 6 = 100,000 operations
grade 7 = 200,000 operations

Door mass. There are three door mass categories:
grade 5 = up to 100 kg
grade 6 = up to 200 kg
grade 7 = over 200 kg

Suitability for use on fire/smoke resistant doors. There are three fire/smoke resistance categories:
grade 0 = not suitable for fire/smoke resistant doors
grade A = suitable for smoke resistant doors
grade B = suitable for fire/smoke resistant doors

People's safety. All mergency exit devices have a critical safety function: only top grade is identified for the purposes of this European standard.

Corrosion resistance. There are two categories as per prEN1670:
grade 3 = 96 h (high resistance)
grade 4 = 240 h (very high resistance)

Goods' security. There are four categories:
grade 2 = durability 1000 N
grade 3 = durability 2000 N
grade 4 = durability 3000 N
grade 5 = durability 5000 N

Projection of bar. There are two categories:
grade 1 = bar projection up to mm 150 (large projection)
grade 2 = bar projection up to mm 100 (standard projection)

Type of bar operation. There are 2 types of operations:
A = emergency exit device with "lever handle" operation
B = emergency exit device with "push pad" operation

Field of door application. There are four categories:
A = outwardly opening single exit door, double exit door: active or inactive leaf
B = outwardly opening single exit door only
C = outwardly opening double exit door: inactive leaf only
D = inwardly opening single exit door only.

For further information please refer to EN179:2008 standard.

ICIM CERTIFIED PRODUCT CE 1121

Warning

The field of application of these panic exit devices is limited to following:

Maximum door mass	Maximum door height	Maximum door width	Temperature interval
200 Kg	2520 mm	1320 mm	-10°C +60°C

The limits indicated above are identified by EN1125 standard. ISEO Serrature declares that the performances of the devices and their accessories are in compliance with the requirements of the standard, for doors with mass max. 200 kg, height max. 3400 mm and width max. 1320 mm..

The door leavers and frames must be made of a material with sufficient rigidity to ensure that any distortions that occur during use can not exceed 5 mm in any position. The device must be fitted to the door leaf using materials that guarantee a tensile strength for each screw of >1,5KN.

Products certifications

Iseo Serrature has been awarded by Warrington Certification Limited (WCL) the certificate of conformity with EN 179:2008 standard allowing to apply the CE mark on panic exit devices, compulsory from 01/04/2003.
Idea panic exit devices have already obtained the Voluntary Product Certification by an independent organisation, ICIM, as provided for in EN 179:2008.
The ICIM voluntary certification establishes stricter requirements than the CE mark.

All the updated certificates can be downloaded from our web site: www.iseoserrature.it

Example of product certification.

SWISSDOOR
DØRTEKNIK FOR PROFESSIONELLE

Trim-Tronic

Electronic control

Trim-Tronic

The Trim-Tronic unit interfaces with multipoint locking panic bars, providing a long awaited solution to the problem where a door is opened by a panic bar from the inside but cannot be accessed from the outside.
The Trim-Tronic allows you to use access control on panic exit, overriding the bar from the outside whilst still allowing safe emergency exit from the building.

Protection grade: IPX4
The device can be **used also outdoors.**

Key points

Designed to interact with all ISEO panic exit devices with 1, 2 and 3 top and bottom locking points.
Conceived to comply with the requirements of EN 1125:08 standard.
Works on single and double doors.
Can replace any mechanical ISEO outside access unit.
Provided with anti-vandalism handle.
Can be easily installed on any type of frame (aluminium, pvc, wood, etc.).
12 Vdc power supply.

Main functions

- It can be combined with mechanical mortice panic exit devices.
- Mechanical free access mode: it allows free access from outside for a programmed time.
- It is reversible: can be installed both on right and left handed doors.
- The handle can be enabled and disabled through the cylinder. The 2 signaling Leds indicate the handle enabling status.
- Handle enabled and disabled by two remote electric pulses connected with cable (ref. 94403030E) and connector which also transfers the power supply and signals handle status.
- Remote electric pulse are:
  Pushbutton 1: handle enabled for 5 seconds or for the time the pushbutton is pressed
  Pushbutton 2: key disabled.

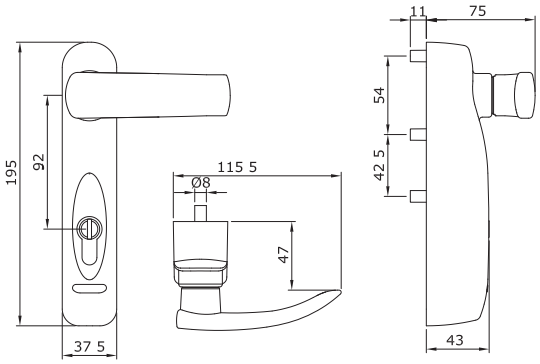

Technical features:

Zamak case.
Idle handle if disabled.
Power supply 12 Vdc (2A peak).
Handle and key status signaling output (enabled/disabled)
Enabling/disabling pushbutton input.
Mechanical key locking pushbutton input.
European single profile cylinder, mm 40 (30-10).
Handle follower 8 mm.
Operating temperature: from -20°C to 60°C.

ICIM CERTIFIED PRODUCT CE 1121

Trim-Tronic

EXTERNAL ELECTROMECHANICAL CONTROL FOR PANIC EXIT DEVICES.
It can be used in combination with mechanical rim panic exit devices.

SWISSDOOR
DØRTEKNIK FOR PROFESSIONELLE

Locks for fire resistant doors

DOUBLE SAFETY: NO PANIC, NO BACTERIA

In line with its attention to safety, ISEO has decided to add this measure to a device which is always present in public environments and in all those places where hygiene and healthcare is a basic requirement: hospitals, clinics, treatment homes, but also child care centres and nursery schools.

Therefore, the panic function is enriched with the antibacterial protection, AntiGerm*, whose performance is certified by Padova University Molecular Medicine Department.

The antibacterial treatment action is permanent and does not require special maintenance. The constant release of silver ions ensures top efficiency throughout the product life, even in case of surface scratches.

***Antibacterial protection for panic exit devices and accessories (except for Stainless steel/PVD finishes).**

IDEA Base Infilare for main and secondary leaf

The panic exit device for fire resistant doors with MORTICE LOCK FOR MAIN LEAF is made up of a horizontal bar which operates the locking mechanism through the handle follower. The operation of the bar causes the rotation of the handle follower, unlocks the lock and opens the door. Reversible mechanism for usage on right or left handed doors. All versions can be used with a microswitch that signals door openings.

Locking mechanism	Bar	Lock	Striking plate

Push-Infilare for main and secondary leaf

The panic exit device for fire resistant doors with MORTICE LOCK FOR MAIN LEAF is made up of a horizontal bar which operates the locking mechanism through the handle follower. The operation of the bar causes the rotation of the handle follower, unlocks the lock and opens the door. Supplied in sizes mm 840 and 1165, shortenable to mm 330, reversible mechanism in metal grey or red/black finish for usage on right- or left-handed doors. All versions can be used with a microswitch that signals door openings. Shortenable fixing plate allowing the assembly also without the cylinder.

Bar	Lock	Striking plate

Door closers

Registered community design

CE

What is the CE marking?

The CE marking on a product signifies that the manufacturer will have fulfilled all the essential requirements as listed by all the EU Directives and EU Regulations applicable to the product.

The CE marking is issued by Notified Bodies such as ICIM (Italy), WARRINGTON (United Kingdom), AENOR (Spain), MPA Dortmund (Germany), etc.

The CE marking:

- according to CRP Regulation, is mandatory on controlled door closing devices (EN1154), door coordinator devices (EN1158), electrically powered hold-open devices (EN1155) suitable for fire resisting and/or smoke control doorsets;

- guarantees that the product can be freely circulated in the European market;

- indicates that the product conforms to all the essential requirements of the applicable harmonized standards.

It is mandatory to put the CE marking on the product and in the user manual and/or on the packaging.

The CE certificate of constancy of performance issued by a Notified Body guarantees that all the initial type tests (mechanical, environmental, fire) and the production system meet the European harmonized standards.

The manufacturer draws up the Declaration of Performance (DoP) based on the certificate of constancy of performance issued by a Notified Body.

EN1154 in a few words

The EN1154 is harmonized with the EU Regulation 305/2011 CPR.

The EN1154 supersedes any other national standards.

The EN1154 specifies requirements for controlled door closing devices for swing doors, such devices being mounted on or in the frame, on or in the door, or in the floor.

The scope is limited to manually operated door closing devices where the energy for closing is generated by the user upon opening the door, such that when the door is released, it returns to a closed position, in a controlled manner.

Devices such as spring hinges, which do not exert a checking control during door closing, are outside the scope of this standard.

EN1154 classification

Category of use
Grade 3
for closing door from at least 105° open

Grade 4
for closing door from 180° open

Door closer power size
Seven door closer power sizes have been identified according to the door mass. When a door closer has a minimum and maximum force, this must be indicated e.g.: 2/3

Door closer power size	Recommended door leaf width (max.)	Door mass
1	<750 mm	20 kg
2	850 mm	40 kg
3	950 mm	60 kg
4	1100 mm	80 kg
5	1250 mm	100 kg
6	1400 mm	120 kg
7	1600 mm	160 kg

Safety
Grade 1: all door closers are required to satisfy the essential requirement of safety in use.

Consequently, only grade 1 is defined.

4 8 4 1 1 3

Durability
Only one grade is defined.

Grade 8 = 500,000 test cycles

Suitability for use on fire/smoke doors
Grade 0: not suitable for use on fire/smoke doors
Grade 1: suitable for use on fire/smoke doors

Due to their low closing moments door closers size 1 and 2, without adjustable closing force, are not considered suitable for use on fire/smoke door assemblies. The door closer shall not include a hold-open device unless it is an electrically powered device in accordance with EN 1155.

Corrosion resistance
Grade 0:
no defined corrosion resistance
Grade 1:
Mild resistance
Grade 2:
Moderate resistance
Grade 3:
High resistance
Grade 4:
Very high resistance

CE Marking on fire resisting and/or smoke control doorsets

Starting from 1st of September 2016 it will be possible to put CE marking on fire resisting and/or smoke control doorsets according to EU Regulation 305/2011 CPR and harmonized standard EN16034:2014 - Pedestrian doorsets, industrial, commercial, garage doors and openable windows - Product standard, performance characteristics - Fire resisting and/or smoke control characteristics. Beginning from that date, the present procedures will coexist for a period of 3 years. During that period the manufacturer can choose whether to put the CE marking on the door, or to use the current homologations rules.

The below mentioned essential characteristics have to be declared by the fire/smoke resisting doors manufacturer following the Declaration of Performance (DoP):

Resistance to fire (EI/EW): is the capability of the products to provide "integrity" (E), and "insulation" (I) or "radiation" (W) followed by the minutes for which the requirement is satisfied (e.g. EI90 means that the doorset maintains fire resistance for at least 90 minutes)

Smoke resistance (S): is the capability of the products to prevent smoke leakage at a given temperature (e.g. S_{200} means that the doorset maintains smoke resistance requirements until 200°C, S_a means ambient temperature)

Ability to release and durability: is the ability to release of the hold open device of a doorset and/or openable window to ensure reliable closing of the doorset and from a defined position

Ability of self-closing and durability: is the ability of an open doorset to close fully into its frame and engage any latching device that may be fitted, without human intervention, by stored energy, or by mains power backed up by stored energy in case of power failure.

Hardware for fire resisting and/or smoke control doorsets

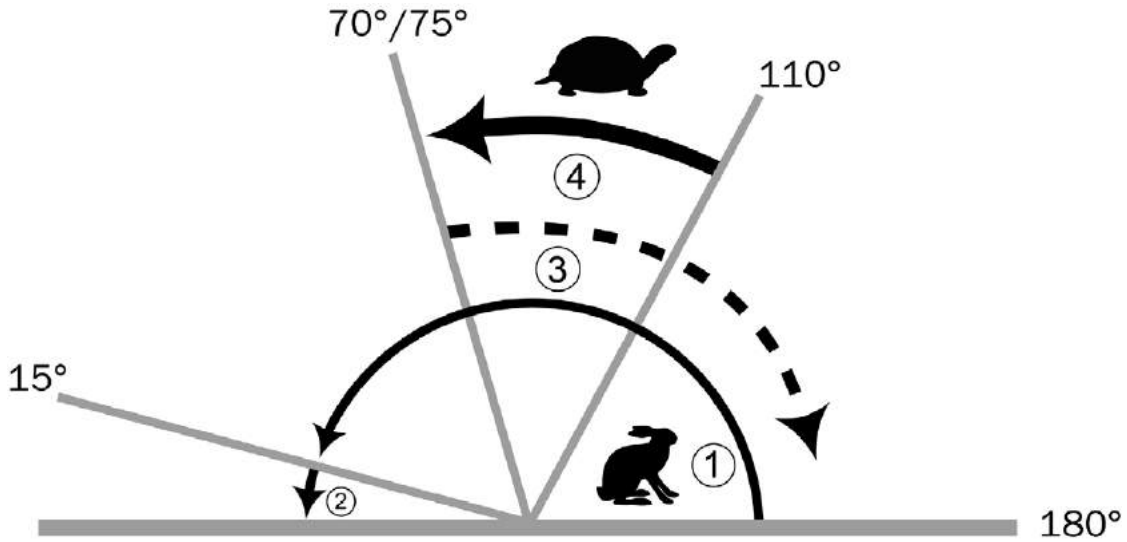

The EN16034 refers to the following standards:

- EN 15269 EXAP (EXtended APplication) series used by Notified Bodies to extend the test results to other doorsets configurations.

- EN 16035 Hardware performance sheet (HPS). Identification and summary of test evidence to facilitate the inter-changeability of building hardware for application to fire resisting and/or smoke control doorsets and/or openable windows

The EN16035 requires that each family of hardware is accompanied by a document called "HPS - Hardware Performance Sheet". The HPS is like a "hardware identity card", and contains information required by the Notified Body that, by using EXAP can approve hardware for different types of fire resisting and/or smoke control doorsets.

Adjustment available according to the door closer

1. Closing speed adjustment

This adjustment performs from the maximum opening range up to the last 15 degrees. It adjusts the closing speed of the door in the above described range.

2. Latching action

This adjustment performs during the final 15 degrees of closing action. The final latching allows the door to close quickly, firmly or smoothly.

3. Adjustable backcheck

This adjustment starts from 70°. It allows hydraulic slowing down of the door when it is opened. It is possible to set the reduction rate as required.
This adjustment is mainly used on doors that open outwards (e.g. emergency exits, etc).

Adjustments available according to the door closer

4. Adjustable delayed closing action

This adjustment performs within a range from minimum opening angle of 90° to 75°. It allows the door closing to be delayed. It is possible to set a delay of 90 seconds from 90° to 75° for example.

5. Closing force adjustment

This adjustment is not represented in the drawing on the previous page. However it allows you to adjust the closing force according to the door requirements. This adjustment can be achieved in two different ways:
- adjustment screw
- moving the body or the arm position

IS9100

TOP QUALITY
For doors up to 1100 mm in width and 160 kg in weight.
For internal doors and doors opening outwards (single action door, non handed).

Application conditions	- Ambient temperature: -15°C +50°C
	- Air humidity max. 93 % non-condensing
	- Power supply: 230 Vac +10%/-15%, 50Hz
	- Protection grade: IP 20
Max. power input	120 Watt
Closing force EN1154	EN2-4 adjustable (also after installation)
Max. door panel weight	120kg or 160kg with upgrade card “Full Energy”
	depending on the door panel width.
Door panel width	700 – 1100 mm
Min. clearance between the hinges of the 2 door panels	1400 mm
Max. lintel depth with standard arm	Up to 225 mm
Device weight	12 kg
Power supply for external devices	24 Vdc +/-5%, 1,5 A
Door opening angle	Max 110°, depending on the type of installation
Fuse on power supply (not included)	16 A
Noise during operation	Max 50 dB
Software (Firmware)	On-site upgrading
Signalling	- Leds: green, red, yellow
	- Display for programming
Advanced features	- Temperature related overload protection
	- Driving speed automatic optimization
Dimensions (LxHxD)	685 x 70 x 130 mm

IS9100

Application:
Drive IS9100 is an electromechanical swing door operator for single or double leaves doors.
It can be installed both on new and existing doors. It can be operated in 2 modes: automatic swing door operator mode (i.e. opening after a pulse generated by motion sensor or pushbutton) and manual opening mode (i.e. the device is used as a traditional door closer).
Drive is equipped either with a sliding arm for the installation on pull side or with a standard arm for the installation on push side with lintel depth of 225 mm maximum.

An integrated internal selector allows to easily set 4 different functions:
- Off;
- Automatic;
- Permanent opening;
- Exit only.

In case of power failure, the device works like a simple door closer.
With the manual opening mode, the function “power assist” allows to make the opening more comfortable.

Technical drawings available in the instruction manual

Installation/Arm configuration:
Sliding arm: pull side
Sliding arm: push side (not suitable for fire resistant doors)
Standard arm: push side
Standard axle extension 9 mm (included)

Features:
- Speed adjustment.
- Hold open door adjustment.
- Safety sensor management
- Lock open input management
- Latching action adjustment
- Function “Push & Go”
- Emergency opening or closing programmable (Fail Safe or Fail Secure)
- Force adjustment from 2 to 4 according to standard EN1154
- Opening angle adjustment: until 110°
- Low noise functioning (<50dB)
- Temperature overload protection
- Wind impact automatic adaptation
- Integrated in Iseo Access Control Systems

CONNECTIONS:

INPUTS:
1. Connecting terminals: max 1.5 mm2
2. Potential-free activator: internal and external (NO contact)
3. Powered activator (intercom, key switch,...):
- 8 – 24 Vdc/Vac + 5%
- NO contact/NC contact
4. Safety Sensor (intercom, key switch,...):
- hinge side and opposite hinge side (NC contact)
5. Test signal for safety sensor: hinge side and opposite hinge side
6. Shutdown drive function: NC contact/NO contact

OUTPUTS:
1. Connecting terminals: max 1.5 mm 2
2. Potential-free status contact (relais): Programmable
- Door closed
- Door open
- Error
- Door closed and locked

Fire prevention
Electrically
powered hold open device

Technical drawings available in the instruction manual

Application:
- Product hold doors open thanks to its electromagnet.
- In case of fire detection, fire alarm panel activate door closing by failure of power supply.
- People can evacuate because only door closer function stay active.

Application field:
- For single or double leaves
- For fire resistant door
- Installation on pull side (standard)
- Installation push side (limited)
- Door width max.: 1250mm
- Door weight max.: 120kg

Versions/accessories:
- 2 versions for single leaf depending on door width (up to 950 mm with door closer in force 3)
- 2 versions for double leaves depending on door width. These products are supplied in 3 parts, with a central part adjustable in length.

Features:
- Non-handed installation on pull side (single or double doors).
- Door closer with ISEO design and closing speed adjustable per valves.
- All devices are included in aesthetical slide channel.
- Automatic dual voltage 24-48 Vdc (standard equipment).
- Connection possible into both ends (aligned with hinges) with pluggable terminal block directly inside the product.
- Triple protection on electric card, against over-voltage, short circuit and current feedback.
- One electro magnet adjustable in force and in position per leaf.
- On top, there is a button with 2 functions:
  - Activate electromagnet at the first installation or after fire alarm (switch on/off function).
  - Close doors without pull on leaves.
- Door coordinator included for the version BCS2000/2.
- Contacts of position in free potential to know if the door is closed or hold open.
- Electronic delay action function can be activated.
- One LED to indicate product status information.
- Closing time adjustment steady and reliable.
- 2 years warranty.

FL96 Evo

Waiting position

To preserve opening angle of 105°, dimension "X" can change according to door dimension ("X" common = 43mm)

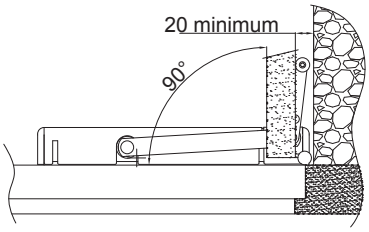

Active position

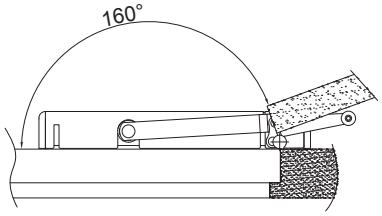

Technical drawings available in the instruction manual

Application:
- Device which leaves door totally free in normal condition.
- In case of fire detection, fire detector or fire alarm panel blocks the door by failure of power supply.
- The electromagnet releases the arm which, thanks to the wheel, closes completely the door whatever its position.

Application field:
- For single action door supplied
- Non handed (in DIN right)
- For fire resistant door
- Product installation always on frame, in pull side
- Door width max.: 950mm
- Door weight max.: 60kg

1st configuration: right angle arm

2nd configuration: long arm

Versions/accessories:
- Version standard.
- Version with contact of position.
- Arm extension kit 2 positions: (pieces you need to add to standard arm of FL96 evo)
  - 1st configuration: right angled arm, useful when there is a wall perpendicular and very close to the door.
  - 2nd configuration: long arm, useful when you want to increase maximum opening angle to 160°.

Features:
- Full cover in waiting position. Brushed aluminium finish.
- Closing speed adjustable by valves.
- Closing time adjustment steady and reliable.
- 2 possibilities for power supply input.: either on the top or directly inside.
- Automatic electronic card with dual voltage 24-48Vdc including connection with pluggable terminal block directly inside the product.
- Concealed fixing.
- Non-handed, even with both configuration of arm extension kit 2 positions.
- Contact of position in free potential to know if the door is closed and if the arm is always in waiting position (C, NO, NC).
- 2 years warranty.

Technical drawings available in the instruction manual

Application field:
- For internal doors and doors opening outwards
- For single action door
- Non-handed for mounting on door or on frame (right or left opening)
- For fire resistance door and smoke proof door
- For every type of door set material (wood, aluminium, steel, etc.)
- Door width max. 1250 mm
- Door weight max. 120 kg.

Versions/accessories:
- Standard colours: silver, white and black.
- IS315 RV (silver only) door leaf installation opposite hinge side.
- Accessories:
  - Cushioned limit stay: CLS (deed stop unit common to all guide rail door closer).
  - Adjustable hold open device: HOD (only one item for every slide channel of our new range).
  - Mounting plate.

Features:
- Full cover with new design ISEO protecting every adjustment valves.
- Closing and opening speed adjustable by valves present on the front of the device allowing an easy adjustment.
- Door closer with delayed closing action as standard, adjustable by valve, to allow a delayed closing time as by customer needs. Useful for buildings where a longer passage through the doorway is required (for persons and goods).
- Door closer with backcheck as standard, adjustable by valve, for outwards opening doors ensuring a controlled opening to protect door and wall against wind effect.
- Concealed fixing.
- Low resistance during door opening.
- Anti-vandalism arm.
- Closing time adjustment steady and reliable.
- 2 years warranty.
